Prospectus
Stone Ridge Trust II
Stone Ridge Reinsurance Risk Premium Interval Fund
Common Shares

The Fund. Stone Ridge Reinsurance Risk Premium Interval Fund (the “Fund”) is a non-diversified, closed-end management investment company that continuously offers its shares (“Shares”).

Investment Objective. The Fund’s investment objective is to achieve long-term capital appreciation. There can be no assurance that the Fund will achieve its investment objective.

Investment Strategy. The Fund pursues its investment objective primarily by investing in reinsurance-related securities, including event-linked bonds, shares or notes issued in connection with quota shares (“Quota Share Notes”), shares or notes issued in connection with excess-of-loss, stop-loss or other non-proportional reinsurance (“Excess of Loss Notes”), shares or notes issued in connection with industry loss warranties (“ILW Notes”) and, to a lesser extent, event-linked swaps, equity securities (publicly or privately offered) and the derivatives of equity securities of companies in the reinsurance and insurance industry (collectively, “reinsurance-related securities”). Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in reinsurance-related securities. Reinsurance-related securities typically are below investment-grade or are unrated. Reinsurance-related debt securities that are below investment-grade may be referred to as “junk bonds.” Accordingly, the Fund’s portfolio will be primarily invested in high yield, high risk securities. The Fund may also enter into other types of investments that enable the Fund to provide risk transfer services, as the Adviser may consider appropriate from time to time.

Investment Adviser. The Fund’s investment adviser is Stone Ridge Asset Management LLC (“Stone Ridge” or the “Adviser”). As of December 31, 2016, Stone Ridge managed approximately $8.8 billion of assets.

- The Fund does not intend to list its Shares on any securities exchange and the Fund does not expect a secondary market in its Shares to develop.
- An investment in the Fund is not suitable for investors who need certainty about their ability to access all of the money they invest in the short term.
- Even though the Fund will make quarterly repurchase offers for a minimum of 5%, and currently expects to offer to repurchase 5%, of its outstanding Shares, investors should consider shares of the Fund to be an illiquid investment.
- There is no assurance that the Fund will be able to maintain a certain level of distributions.
- Distributions may be funded from offering proceeds, which may constitute a return of capital and reduce the amount of capital available for investment.
- Distributions may also be funded in significant part from voluntary expense reimbursements and waivers by the Fund’s affiliates that are subject to repayment to them. The repayment of any amounts owed to affiliates will reduce the distributions to which future shareholders would otherwise be entitled.

Some of the securities in which the Fund will invest will be rated below investment grade or will be unrated but judged by the Adviser to be of comparable quality. Below investment grade securities, which are often referred to as “junk,” have predominantly speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. They may also be illiquid and difficult to value.

An investment in the Fund’s Shares should be considered speculative and involving a high degree of risk, including the risk of a substantial loss of investment. See “Risk Considerations” below to read about the risks you should consider before buying Fund Shares.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of these securities or determined this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.
The Fund’s Shares are sold at a public offering price equal to their net asset value per share and are not subject to any charge as of the date of this Registration Statement. See “Fund Expenses” and “Shareholder Guide — How to Buy Shares” below.

The date of this prospectus is March 1, 2017

**Interval Fund.** The Fund has an interval fund structure pursuant to which the Fund, subject to applicable law, conducts quarterly repurchase offers and currently expects to offer to repurchase 5% of the Fund’s outstanding Shares at net asset value (“NAV”), subject to approval of the Board of Trustees (the “Board” and each of the trustees on the Board, a “Trustee”). It is also possible that a repurchase offer may be oversubscribed, with the result that shareholders may only be able to have a portion of their Shares repurchased. **There is no assurance that you will be able to tender your Shares when or in the amount that you desire.** The Fund’s Shares are not listed and the Fund does not currently intend to list its Shares for trading on any national securities exchange. There is not expected to be any secondary trading market in the Shares. The Shares are, therefore, not marketable. Even though the Fund will make quarterly repurchase offers to repurchase a portion of the Shares to try to provide liquidity to shareholders, you should consider the Shares to be illiquid.

**Investment in the Fund involves substantial risks.** The Fund is generally sold to (i) institutional investors, including registered investment advisers (RIAs), that meet certain qualifications and have completed an educational program provided by the Adviser; (ii) clients of such institutional investors; and (iii) Eligible Investors (as defined in “How to Buy Shares” below). The minimum initial account size is $15 million, subject to certain exceptions. See “Investment Minimums” below. Investors should carefully consider the Fund’s risks and investment objective, as an investment in the Fund may not be appropriate for all investors and is not designed to be a complete investment program. An investment in the Fund involves a high degree of risk. The reinsurance-related securities in which the Fund invests are typically considered “high yield” and many reinsurance-related debt securities may be considered “junk bonds.” It is possible that investing in the Fund may result in a loss of some or all of the amount invested. Before making an investment/ allocation decision, investors should (i) consider the suitability of this investment with respect to an investor’s or a client’s investment objectives and individual situation and (ii) consider factors such as an investor’s or a client’s net worth, income, age, and risk tolerance. Investment should be avoided where an investor/client has a short-term investing horizon and/or cannot bear the loss of some or all of their investment. Before investing in the Fund, an investor should read the discussion of the risks of investing in the Fund in “Investment Objective, Policies and Risks” below.

This prospectus sets forth concisely information you should know before investing in the Shares. You should read this prospectus carefully before deciding to invest in the Fund and you should retain it for future reference. A Statement of Additional Information dated March 1, 2017, as it may be amended, containing additional information about the Fund, has been filed with the Commission. The Statement of Additional Information, annual and semi-annual reports to shareholders and other information about the Fund can be obtained without charge by calling (855) 609-3680 or by visiting www.stoneridgefunds.com. A table of contents to the Statement of Additional Information is located at page 51 of this prospectus. This prospectus incorporates by reference the entire Statement of Additional Information. The Statement of Additional Information, as well as material incorporated by reference into the Fund’s Registration Statement, and other information regarding the Fund, are available: at the Commission’s public reference room in Washington, DC (call (202) 942-8090 for information on the operation of the reference room); from the EDGAR database on the Commission’s internet site (www.sec.gov); upon payment of copying fees by writing to the Commission’s public reference section, Washington, DC 20549-0102; or by electronic mail at publicinfo@sec.gov. The Fund’s address is 510 Madison Avenue, 21st Floor, New York, NY 10022.

**Shares of the Fund do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.**

An investor should not construe the contents of this prospectus as legal, tax or financial advice. You should consult your own professional advisors as to legal, tax, financial or other matters relevant to the suitability of an investment in the Fund.

PROSPECTUS SUMMARY

This is only a summary. This summary may not contain all of the information that you should consider before investing in the Fund’s Shares. You should review the more detailed information contained in this prospectus and in the Statement of Additional Information. In particular, you should carefully read the risks of investing in the Fund’s Shares, as discussed under “Investment Objective, Policies and Risks — Risk Considerations.”

The Fund

Stone Ridge Reinsurance Risk Premium Interval Fund (the “Fund”) is a non-diversified, closed-end management investment company that continuously offers its shares (the “Shares”). The Fund is operated as an “interval fund” (as defined below). An investment in the Fund may not be appropriate for all investors.

Stone Ridge Asset Management LLC (“Stone Ridge” or the “Adviser”) is the Fund’s investment adviser.

The Offering

The Fund’s Shares are offered on a continuous basis at net asset value (“NAV”) per Share. The Fund may close at any time to new investments and, during such closings, only the reinvestment of dividends by existing shareholders will be permitted. The Fund may re-open to new investment and subsequently close again to new investment at any time at the discretion of the Adviser.

The Fund is made available for investment on a priority basis to a group of investors (the “Consortium”) who have participated in educational sessions regarding the Fund and the asset class in which it invests. If capacity allows, once orders are fulfilled for the Consortium, the Fund is then made available for investment by other investors. The Fund may also prioritize and allocate capacity to the Consortium upon any subsequent re-opening of the Fund. The Consortium members do not have any special rights to offering price, dividends or liquidation. The Consortium consists of a selected group of registered investment advisers who have discretionary authority to invest on their clients’ behalf and a fiduciary duty to their clients, and with whom the Adviser has a previous relationship. Members of the Consortium and their clients are not obligated to invest in the Fund.

The Fund’s Shares are offered through Quasar Distributors, LLC (the “Distributor”), as the exclusive distributor on a best efforts basis. The minimum initial investment is $15 million, subject to certain exceptions. The Fund reserves the right to reject a purchase order for any reason. See “Shareholder Guide — How to Buy Shares” below. Shareholders will not have the right to redeem their Shares. However, as described below, in order to provide liquidity to shareholders, the Fund conducts periodic repurchase offers for a portion of its outstanding Shares.

Periodic Repurchase Offers

The Fund is an “interval fund,” a type of fund which, in order to provide liquidity to shareholders, has adopted a fundamental investment policy to make quarterly offers to repurchase between 5% and 25% of its outstanding Shares at NAV. Subject to applicable law and approval of the Board, for each quarterly repurchase offer, the Fund currently expects to offer to repurchase 5% of the Fund’s outstanding Shares at NAV, which is the minimum amount permitted. The Fund makes quarterly repurchase offers in the months of January, April, July and October. Written notification of each quarterly repurchase offer (the “Repurchase Offer Notice”) is sent to shareholders at least 21 calendar days before the repurchase request deadline (i.e., the date by which shareholders can tender their Shares in response to a repurchase offer) (the “Repurchase Request Deadline”). The Fund’s Shares are not listed on any securities exchange, and the Fund anticipates that no secondary market will develop for its Shares. Accordingly, you may not be able to sell Shares when and/or in the amount that you desire. Thus,
the Shares are appropriate only as a long-term investment. In addition, the Fund’s repurchase offers may subject the Fund and shareholders to special risks. See “Principal Risks of the Fund — Repurchase Offers Risk” below.

**Investment Objective and Policies**

The Fund’s investment objective is to achieve long-term capital appreciation. There can be no assurance that the Fund will achieve its investment objective.

The Adviser believes that investing in reinsurance-related securities should involve a long-term view and a systematic focus on sources of expected return, not on security selection or market timing. In constructing an investment portfolio, the Adviser identifies a universe of eligible securities with well-defined risk and return characteristics. It then seeks to obtain broad investment exposure to a meaningful subset of that universe while efficiently managing the portfolio and keeping trading costs low. Because the risks in reinsurance-related securities — largely related to natural or non-natural disasters, such as earthquakes or plane crashes — are not similar to the risks investors bear in traditional equities and debt markets, the Adviser believes that investment in reinsurance-related securities may provide benefits when added to traditional portfolios. As such, the Adviser does not intend to buy or sell securities for the portfolio based on prospects for the economy or based on movements of traditional equities and debt securities markets.

The Fund pursues its investment objective by investing primarily in reinsurance-related securities, including event-linked bonds, shares or notes issued in connection with quota shares (“Quota Share Notes”), shares or notes issued in connection with excess-of-loss, stop-loss or other non-proportional reinsurance (“Excess of Loss Notes”), shares or notes issued in connection with industry loss warranties (“ILW Notes”) and, to a lesser extent, event-linked swaps, equity securities (publicly or privately offered) and the derivatives of equity securities of companies in the reinsurance and insurance industry (collectively, “reinsurance-related securities”). Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in reinsurance-related securities. Reinsurance-related securities typically are “high-yield” or below investment-grade or are unrated. Reinsurance-related debt securities that are below investment-grade may be referred to as “junk bonds.” Accordingly, the Fund’s portfolio will be primarily invested in high yield, high risk securities. High yield securities typically are of below investment grade quality and have below investment grade credit ratings, which ratings are associated with securities having high risk, speculative characteristics. High yield securities may also include securities that are not rated. The Adviser has broad discretion to allocate the Fund’s assets among these investment categories. The Fund may invest in reinsurance-related securities across the high yield spectrum, but generally intends to focus its investments in higher yielding, higher risk securities within the below investment-grade category. The Fund has no limit as to the maturity of the securities in which it invests or as to the market capitalization of the issuer. To the extent consistent with the repurchase liquidity requirement of an interval fund, the Fund may invest without limitation in illiquid securities.

Event-linked bonds are variable rate debt securities for which the return of principal and payment of interest are contingent on the non-occurrence of a specified trigger event(s) that leads to economic and/or human loss, such as an earthquake of a particular magnitude or a hurricane of a specific category. The most common type of event-linked bonds is known as “catastrophe” or “CAT” bonds.

Trigger events may include hurricanes, earthquakes and weather-related phenomena, non-natural catastrophes, such as plane crashes, or other events resulting in a specified level of physical or economic loss, such as mortality or longevity. Trigger events are typically defined by three criteria: an event; a geographic area in which the event must occur; and a threshold of economic or physical loss (either actual or modeled) caused by the event, together with a method to measure such loss. In order for a trigger event to be deemed to have occurred, each of the three criteria must be satisfied while the bond is outstanding or the derivative position remains open. The Fund has no limit as to the types of events, geographic areas or thresholds of loss referenced by event-linked bonds in which it can invest. Generally, the event is either a natural or non-natural peril of a kind that results in
significant physical or economic loss. Natural perils include disasters such as hurricanes, earthquakes, windstorms, fires and floods. Non-natural perils include disasters resulting from human activity such as commercial and industrial accidents or business interruptions.

The reinsurance-related securities in which the Fund typically invests are preferred shares or notes issued by a special purpose vehicle (“SPV”) whose performance is tied to underlying reinsurance transaction(s), including Quota Share Notes, Excess of Loss Notes and ILW Notes. The Fund, as holder of a note or preferred share issued by the SPV, would be entitled to participate in the underwriting results and investment earnings associated with the SPV’s underlying reinsurance contracts.

Investments in Quota Share Notes provide exposure to a form of proportional reinsurance in which an investor participates in the premiums and losses of a reinsurer’s portfolio according to a pre-defined percentage. For example, under a 20% quota-share agreement, the SPV would obtain 20% of all premiums of the subject portfolio while being responsible for 20% of all claims, and the Fund, as holder of a Quota Share Note issued by the SPV, would be entitled to its pro rata share of the premiums received by the SPV and would be responsible for its pro rata share of the claims, up to the total amount invested.

Investments in Excess of Loss Notes provide exposure to a form of reinsurance pursuant to which one party (typically an insurer or reinsurer) purchases protection against losses that exceed a specified threshold up to a set limit. For example, under such an arrangement, an insurer may have a book of business with $6 billion of total risk in respect of large, catastrophic losses. Such an insurer can purchase reinsurance protection from an SPV for 40% of single-event losses the insurer suffers between $4 billion and $5 billion by paying the SPV a fixed premium. In this example, if the insurer suffered a loss of $5 billion due to one event, it would cover the first $4 billion itself and file a reinsurance claim with the SPV to pay 40% of the further $1 billion in losses (i.e., $400 million) and pay the remaining $600 million itself. If the insurer had losses of $6 billion, it would cover the first $4 billion itself, look to the SPV to pay 40% of $1 billion (again paying the $600 million itself) and would further retain the obligation to pay the additional $1 billion that exceeds the reinsurance (which, in this example, covered losses between $4 billion and $5 billion). The “trigger” for this type of reinsurance contract would be losses in excess of the specified amount.

Investments in ILW Notes provide exposure to a transaction through which one party (typically, an insurance company or reinsurance company, or a reinsurance-related asset manager) purchases protection based on the total loss arising from a catastrophic event to the entire insurance industry rather than the losses of any particular insurer. For example, the buyer of a “$100 million limit US Wind ILW attaching at $20 billion” will pay an upfront premium to a protection writer (i.e., the reinsurer or an SPV) and in return will receive $100 million if total losses to the insurance industry from a single US hurricane exceed $20 billion. The industry loss ($20 billion in this case) is often referred to as the “trigger” and is reported by an independent third party after an event has occurred. The amount of protection offered by the contract ($100 million in this case) is referred to as the “limit.” ILW Notes could also provide exposure to transactions linked to an index not linked to insurance industry losses, such as wind speed or earthquake magnitude and location. The Fund, as holder of an ILW Note, would be entitled to a return linked to the premium paid by the sponsor and the occurrence or non-occurrence of the trigger event.

In implementing the Fund’s investment strategy, Stone Ridge will seek to invest in reinsurance-related securities tied to a varied group of available perils and geographic regions. Further, within each region and peril, Stone Ridge seeks to hold a balance of exposures to underlying insurance and reinsurance carriers, trigger types, and lines of business. The Adviser will continue to monitor the risk of the Fund’s investments on a regular basis.

Many of the reinsurance-related securities in which the Fund will invest will be issued by non-U.S. issuers. As a result, the Fund may invest substantially in securities issued by foreign sovereigns or by U.S. or foreign entities that are corporations, partnerships, trusts or other types of business entities.
Under normal circumstances, the Fund intends to invest substantially all its assets in reinsurance-related securities. The Fund retains the flexibility, however, to invest in other instruments as the Adviser may consider appropriate from time to time, including registered investment companies, U.S. government securities, cash and cash equivalents. The Fund may also enter into other types of investments that enable the Fund to provide risk transfer services, as the Adviser may consider appropriate from time to time. The Fund may make investments in reinsurance-related securities directly or indirectly through one or more wholly-owned and controlled subsidiaries (each, a “Subsidiary”) formed by the Fund. Each Subsidiary may invest in reinsurance-related securities or any other security or other instrument that the Fund may hold directly. The Fund may invest up to 25% of its assets (at the time of purchase) in a Subsidiary. References herein to the Fund include references to a Subsidiary in respect of the Fund’s exposure to reinsurance-related securities.

Leverage

The Fund may obtain leverage through borrowings in seeking to achieve its investment objective. The Fund’s borrowings may be on a secured or unsecured basis and at fixed or variable rates of interest.

The Investment Company Act of 1940, as amended (the “1940 Act”), requires a closed-end fund to maintain asset coverage of not less than 300% of the value of the outstanding amount of senior securities representing indebtedness (as defined in the 1940 Act). This means that the value of the Fund’s senior securities representing indebtedness may not exceed one-third of the value of its total assets (including such senior securities), measured at the time the Fund issues the senior securities. Investments or trading practices that involve contractual obligations to pay in the future are subject to the same requirements unless the Fund designates liquid assets in an amount the Fund believes to be equal to the Fund’s contractual obligations (marked-to-market on a daily basis) or appropriately “covers” such obligations with offsetting positions.

Leverage can have the effect of magnifying the Fund’s exposure to changes in the value of its assets and may also result in increased volatility in the Fund’s NAV. This means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund owned its assets on an unleveraged basis. The value of an investment in the Fund will be more volatile and other risks tend to be compounded if and to the extent that the Fund is exposed to leverage directly or indirectly. See “Effects of Leverage” below.

Investment Adviser and Administrator

Stone Ridge Asset Management LLC is the investment adviser of the Fund. As of December 31, 2016, Stone Ridge managed approximately $8.8 billion of assets. Robert Gutmann, Alexander Nyren, Benjamin Robbins, Ross Stevens and Yan Zhao (the “Portfolio Managers”) are jointly and primarily responsible for the day-to-day management of the Fund. See “Management of the Fund” below.

Distributions

The Fund intends to declare and pay dividends of substantially all net investment income and net realized capital gains at least annually. Unless shareholders specify otherwise, dividends will be reinvested in Shares of the Fund. See “Distributions and Federal Income Tax Matters” and “Dividend Reinvestment Plan” below. The Fund may pay distributions from sources that may not be available in the future and that are unrelated to the Fund’s performance, such as from offering proceeds, borrowings and amounts from the Fund’s affiliates that are subject to repayment by investors.

Distributor, Transfer Agent and Custodian

Quasar Distributors, LLC, of Milwaukee, Wisconsin is the Fund’s distributor. U.S. Bancorp Fund Services, LLC, of Milwaukee, Wisconsin is the Fund’s transfer agent, administrator and accounting agent. U.S. Bank, NA, of
Milwaukee, Wisconsin is the Fund’s custodian. The Adviser or the Fund compensates the distributor for its services. The Fund compensates the transfer agent and the custodian for their services. See “Plan of Distribution,” “Services Agreement” and “Payments to Financial Firms” below.

Unlisted Closed-end Fund Structure; Limited Liquidity

The Fund’s Shares are not listed, and the Fund does not currently intend to list its Shares for trading on any securities exchange and does not expect any secondary market to develop for its Shares. Shareholders of the Fund are not able to have their Shares redeemed or otherwise sell their Shares on a daily basis because the Fund is an unlisted closed-end fund. In order to provide liquidity to shareholders, the Fund is structured as an “interval fund” and conducts periodic repurchase offers for a portion of its outstanding Shares, as described herein. An investment in the Fund is suitable only for long-term investors who can bear the risks associated with the limited liquidity of the Shares. Investors should consider their investment goals, time horizons and risk tolerance before investing in the Fund.

SPECIAL RISK CONSIDERATIONS

An investment in the Fund involves special risk considerations. You should consider carefully the risks summarized below, which are described in more detail under “Investment Objective, Policies and Risks — Risk Considerations” below.

Investors should carefully consider the Fund’s risks and investment objective, as an investment in the Fund may not be appropriate for all investors and is not designed to be a complete investment program. An investment in the Fund involves a high degree of risk. The reinsurance-related securities in which the Fund invests are typically considered “high yield” and many reinsurance-related debt securities may be considered “junk bonds.” It is possible that investing in the Fund may result in a loss of some or all of the amount invested. Before making an investment/allocation decision, investors should (i) consider the suitability of this investment with respect to an investor’s or a client’s investment objectives and individual situation and (ii) consider factors such as an investor’s or a client’s net worth, income, age, and risk tolerance. Investment should be avoided where an investor/client has a short-term investing horizon and/or cannot bear the loss of some or all of the investment. The Fund is subject to the principal risks described below, whether through the Fund’s (i) derivatives positions or other investments, (ii) investments through a Subsidiary, or (iii) direct investments.

Reinsurance-Related Securities Risk. The principal risk of an investment in a reinsurance-related security is that a triggering event(s) (e.g., (i) natural events, such as a hurricane, tornado or earthquake of a particular size/magnitude in a designated geographic area; or (ii) non-natural events, such as large aviation disasters) will occur and the Fund will lose all or a significant portion of the principal it has invested in the security and the right to additional interest payments with respect to the security. If multiple triggering events occur that impact a significant portion of the portfolio of the Fund, the Fund could suffer substantial losses and an investor will lose money. A majority of the Fund’s assets will be invested directly or indirectly in reinsurance-related securities tied to natural events and/or non-natural disasters and there is inherent uncertainty as to whether, when or where such events will occur. There is no way to accurately predict whether a triggering event will occur and, because of this significant uncertainty, reinsurance-related securities carry a high degree of risk.

Event-Linked Bonds. Event-linked or catastrophe bonds carry large uncertainties and major risk exposures to adverse conditions. If a trigger event, as defined within the terms of the bond, involves losses or other metrics exceeding a specific magnitude in the geographic region and time period specified therein, the Fund may lose a portion or all of its investment in such security, including accrued interest and/or principal invested in such security. Such losses may be substantial. Because catastrophe bonds cover “catastrophic” events that, if they occur, will result in significant losses, catastrophe bonds carry a high degree of risk of loss and are considered
“high yield” or “junk bonds.” The rating, if any, primarily reflects the rating agency’s calculated probability that a pre-defined trigger event will occur. Thus, lower-rated bonds have a greater likelihood of a triggering event occurring and loss to the Fund.

**Quota Share Notes, Excess of Loss Notes and ILW Notes.** The Fund may gain exposure (directly or indirectly) to reinsurance contracts through Quota Share Notes, Excess of Loss Notes and ILW Notes. These securities are subject to the same risks discussed herein for event-linked or catastrophe bonds. In addition, because Quota Share Notes, Excess of Loss Notes and ILW Notes represent an interest, either proportional or non-proportional, in one or more underlying reinsurance contracts, the Fund has limited transparency into the individual underlying contract(s) and, therefore, must rely upon the risk assessment and sound underwriting practices of the issuer. Accordingly, it may be more difficult for the Adviser to fully evaluate the underlying risk profile of the Fund’s investment in Quota Share Notes, Excess of Loss Notes and ILW Notes, which will place the Fund’s assets at greater risk of loss than if the Adviser had more complete information. The lack of transparency may also make the valuation of Quota Share Notes, Excess of Loss Notes and ILW Notes more difficult and potentially result in mispricing that could result in losses to the Fund. See “Illiquidity and Restricted Securities Risk” and “Valuation Risk” below. In Quota Share Notes trades, ILW Notes trades and Excess of Loss Notes trades, the Fund cannot lose more than the amount invested.

**Risk-Modeling Risk.** The Adviser, in selecting investments for the Fund, will generally consider risk models created by independent third parties, the sponsor of a reinsurance-related security or a broker. The Adviser may also consider its own risk models based on comparable prior transactions, quantitative analysis, and industry knowledge. Risk models are designed to assist investors, governments, and businesses understand the potential impact of a wide variety of catastrophic events and allow such parties to analyze the probability of loss in regions with the highest exposure. The Adviser will use the output of the risk models before and after investment to assist the Adviser in assessing the risk of a particular reinsurance-related security or a group of such securities. Risk models are created using historical, scientific and other related data, and they may use quantitative methods. Because such risk models are based in part upon historical data and averages, there is no guarantee that such information will accurately predict the future occurrence, location or severity of any particular catastrophic event and thus may fail to accurately calculate the probability of a trigger event and may underestimate the likelihood of a trigger event. Securities or other investments selected using quantitative methods may perform differently from the market as a whole or from their expected performance for many reasons, including factors used in building the quantitative analytical framework, the weights placed on each factor, and changing sources of market returns, among others. In addition, any errors or imperfections in a risk model (quantitative or otherwise), analyses, the data on which they are based or any technical issues with the construction of the models (including, for example, data problems and/or software or other implementation issues) could adversely affect the ability of the Adviser to use such analyses or models effectively, which in turn could adversely affect the Fund’s performance. Risk models are used by the Adviser as one input in its risk analysis process for Fund investments. There can be no assurance that these methodologies will help the Fund to achieve its investment objective.

**Illiquidity and Restricted Securities Risk.** To the extent consistent with the repurchase liquidity requirement of an interval fund, the Fund may invest without limitation in illiquid investments. Illiquidity risk is the risk that the investments held by the Fund may be difficult or impossible to sell at the time that the Fund would like or at the price that the Fund believes the security is currently worth. As a relatively new type of financial instrument, there is limited trading history for reinsurance-related securities, even for those securities deemed to be liquid. There can be no assurance that a liquid market for the Fund’s investments will be maintained. At any given time, the Fund’s portfolio may be substantially illiquid.

The Fund’s ability to realize full value in the event of the need to liquidate certain assets may be impaired and/or result in losses to the Fund. The Fund may be unable to sell its investments, even under circumstances when the Adviser believes it would be in the best interests of the Fund to do so. Illiquid investments may also be difficult
to value and their pricing may be more volatile than more liquid investments, which could adversely affect the price at which the Fund is able to sell such instruments. Illiquidity risk also may be greater in times of financial stress. The risks associated with illiquid instruments may be particularly acute in situations in which the Fund’s operations require cash (such as in connection with repurchase offers) and could result in the Fund borrowing to meet its short-term needs or incurring losses on the sale of illiquid instruments.

Certain of the instruments in which the Fund may invest are subject to restrictions on resale by the federal securities laws or otherwise, such as securities offered privately pursuant to Section 4(a)(2) of the Securities Act of 1933 (the “1933 Act”) and securities issued pursuant to Rule 144A under the 1933 Act. While certain restricted securities may, notwithstanding their limitations on resale, be treated as liquid if the Adviser determines, pursuant to the applicable procedures, that such treatment is warranted, there can be no guarantee that any such determination will continue.

Valuation Risk. The Fund is subject to valuation risk, which is the risk that one or more of the securities in which the Fund invests are priced incorrectly, due to factors such as incomplete data, market instability, or human error. In addition, pricing of reinsurance-related securities is subject to the added uncertainty caused by the inability to generally predict whether, when or where a natural disaster or other triggering event will occur. Even after a natural disaster or other triggering event occurs, the pricing of reinsurance-related securities is subject to uncertainty for a period of time until event parameters, ultimate loss amounts and other factors are finalized and communicated to the Fund. The Fund’s investments in reinsurance-related securities for which market quotations are not available will be valued pursuant to procedures adopted by the Board. The majority of the Fund’s reinsurance-related securities are priced using fair value methods. Portfolio securities that are valued using techniques other than market quotations, including fair valued securities, may be subject to greater fluctuation in their value from one day to the next than would be the case if market quotations were used. There is no assurance that the Fund could sell a portfolio security for the value established for it at any time and it is possible that the Fund would incur a loss because a portfolio security is sold at a discount to its established value. If securities are mispriced, shareholders could lose money upon redemption or could pay too much for Shares purchased.

Moral Hazard Risk. Reinsurance-related securities are generally subject to one or more types of triggers, including so-called “indemnity-triggers.” An indemnity trigger is a trigger based on the actual losses of the ceding sponsor (i.e., the party seeking reinsurance). Reinsurance-related securities subject to indemnity triggers are often regarded as being subject to potential moral hazard, since such reinsurance-related securities are triggered by actual losses of the ceding sponsor and the ceding sponsor may have an incentive to take actions and/or risks that would have an adverse effect on the Fund.

Limited Availability and Reinvestment Risk. Investments in reinsurance-related securities may be limited, which may limit the amount of assets the Fund may be able to invest in reinsurance-related securities. The limited availability of reinsurance-related securities may be due to a number of factors, including seasonal concentration of issuances, limited selection that meets the Fund’s investment objective and lack of availability of reinsurance-related securities in the secondary market.

Investments in Non-Voting Securities Risk. If the reinsurance-related securities in which the Fund invests carry voting rights, the Fund ordinarily will limit such investments to 5% or less of the issuing SPV’s outstanding voting securities. However, to enable the Fund to invest more of its assets in certain SPVs deemed attractive by the Adviser, the Fund may also contractually forego its right to vote securities or may purchase non-voting securities of such SPVs. To the extent the Fund holds non-voting securities of an SPV or contractually foregoes its right to vote securities of an SPV, it will not be able to vote to the full extent of its economic interest on matters that require the approval of the investors in the SPV, including matters that could adversely affect the Fund’s investment in the SPV.
Reinsurance Industry Risk. The performance of reinsurance-related securities and the reinsurance industry itself are tied to the occurrence of various triggering events, including weather, natural disasters (hurricanes, earthquakes, etc.), non-natural large catastrophes and other specified events causing physical and/or economic loss. Triggering events are typically defined by three criteria: an event; a geographic area in which the event must occur; and a threshold of economic or physical loss (either actual or modeled) caused by the event, together with a method to measure such loss. Generally, the event is either a natural or non-natural peril of a kind that results in significant physical or economic loss. Natural perils include disasters such as hurricanes, earthquakes, windstorms, fires and floods. Non-natural perils include disasters resulting from human activity, such as commercial and industrial accidents or business interruptions. Major natural disasters in populated areas (such as in the cases of hurricane Katrina in New Orleans in 2005 and super storm Sandy in the New York City metropolitan area in 2012) or related to high-value insured property (such as plane crashes) can result in significant losses and investors in reinsurance-related securities tied to such exposures may also experience substantial losses. If the likelihood and severity of natural and other large disasters increase, the risk of significant losses to reinsurers may increase.

Floating-Rate Instrument Risks. A significant percentage of the reinsurance-related securities in which the Fund directly or indirectly invests are expected to be variable rate, or floating-rate, event-linked bonds. Floating-rate instruments and similar investments may be illiquid or less liquid than other investments.

Below Investment Grade Securities and Unrated Securities Risk. The Fund may have exposure, without limitation, to reinsurance-related securities that are rated below investment grade or that are unrated but are judged by the Adviser to be of comparable quality. Below investment grade debt securities, which are commonly called “junk bonds,” are rated below BBB- by Standard & Poor’s Ratings Services (“S&P”) or Baa3 by Moody’s Investors Service, Inc., (“Moody’s”), or have comparable ratings by another rating organization. Accordingly, certain of the Fund’s unrated investments could constitute a highly risky and speculative investment, similar to an investment in “junk bonds.”

The rating primarily reflects the rating agency’s calculated probability that a pre-defined trigger event will occur. Therefore, securities with a lower rating reflect the rating agency’s assessment of the substantial risk that a triggering event will occur and result in a loss. The rating also reflects the reinsurance-related security’s credit risk and the model used to calculate the probability of the trigger event. The rating system for reinsurance-related securities is relatively new and significantly less developed than that of corporate bonds and continues to evolve as the market develops. There is no minimum rating on the instruments in which the Fund may invest.

Leverage Risk. The Fund may obtain financing to meet repurchase requests or to make investments in reinsurance-related securities. Therefore, the Fund is subject to leverage risk. The Fund’s borrowings may be on a secured or unsecured basis and at fixed or variable rates of interest. Leverage magnifies the Fund’s exposure to declines in the value of one or more underlying reference assets or creates investment risk with respect to a larger pool of assets than the Fund would otherwise have and may be considered a speculative technique. This risk is enhanced for the Fund because it invests substantially all its assets in reinsurance-related securities. Reinsurance-related securities can quickly lose all or much of their value if a triggering event occurs. Thus, to the extent assets subject to a triggering event are leveraged, the losses could substantially outweigh the Fund’s investment and result in significant losses to the Fund. The value of an investment in the Fund will be more volatile and other risks tend to be compounded if and to the extent the Fund borrows or uses derivatives or other investments that have embedded leverage. The Fund’s ability to obtain leverage through borrowings is dependent upon its ability to establish and maintain an appropriate line of credit. Borrowing will also cost the Fund interest expense and other fees. The cost of borrowing may reduce the Fund’s return.

Derivatives Risk. The Fund may invest directly or indirectly in a variety of derivatives, including options, futures contracts and swaps. Derivatives are financial contracts the value of which depends on, or is derived
from, an asset or other underlying reference. Derivatives involve the risk that changes in their value may not move as expected relative to changes in the value of the underlying reference asset they are designed to track. The Fund may invest in derivatives for investment purposes and for hedging and risk management purposes. Derivatives risk may be more significant when derivatives are used to enhance return or as a substitute for a cash investment option, rather than solely to hedge the risk of a position held by the Fund. See the Statement of Additional Information for additional information of the various types and uses of derivatives in the Fund’s strategy.

The use of derivatives involves risks that are in addition to, and potentially greater than, the risks of investing directly in securities and other more traditional assets. In particular, the Fund’s use of over-the-counter (“OTC”) derivatives exposes it to the risk that the counterparties will be unable or unwilling to make timely settlement payments or otherwise honor their obligations. If the counterparty defaults, the Fund will still have contractual remedies but may not be able to enforce them. The Fund may invest in derivatives with a limited number of counterparties, and events affecting the creditworthiness of any of those counterparties may have a pronounced effect on the Fund.

Derivatives also present other risks described herein, including market risk, illiquidity risk, currency risk and credit risk. OTC derivatives are generally highly illiquid. Many derivatives, in particular OTC derivatives, are complex and their valuation often requires modeling and judgment, which increases the risk of mispricing or improper valuation.

The Fund’s use of derivatives may not be effective or have the desired results. Moreover, suitable derivatives will not be available in all circumstances. The Adviser may decide not to use derivatives to hedge or otherwise reduce the Fund’s risk exposures, potentially resulting in losses for the Fund.

Because many derivatives have a leverage component (i.e., a notional value in excess of the assets needed to establish and/or maintain the derivative position), adverse changes in the value or level of the underlying investment may result in a loss substantially greater than the amount invested in the derivative itself. See “Leverage Risk” above.

Swaps Risk. The Fund may obtain event-linked exposure by investing directly or indirectly in, among other things, event-linked swaps, which typically are contingent, or formulaically related to defined trigger events, or by pursuing similar event-linked derivative strategies. Trigger events include hurricanes, earthquakes, weather-related phenomena and other criteria determined by independent parties. If a trigger event(s) occurs, the Fund may lose the swap’s notional amount. As derivative instruments, event-linked swaps are subject to risks in addition to the risks of investing in reinsurance-related securities, including risks associated with the counterparty and leverage. See “Prospectus Summary — Leverage” above.

Credit Risk. The reinsurance-related securities in which the Fund invests directly or indirectly will be subject to credit risk. The principal invested in many reinsurance-related securities is held by the SPV in a collateral account and invested in various permissible assets set forth under the terms of the SPV. In these cases, typically, the collateral account is invested in high quality U.S. government securities (i.e., U.S. Treasury bonds). However, in certain reinsurance-related securities, the collateral account may be invested in high yielding, higher risk securities. Collateral will generally be invested in accordance with the terms of the SPV and overseen by a collateral manager appointed by the SPV; therefore, the Fund is dependent upon the manager to invest the collateral account proceeds appropriately. A small portion of the reinsurance-related securities in which the Fund invests may, in lieu of such collateral account arrangements, provide for the collateral to be held by the reinsurer. When a collateral account is invested in higher yielding, higher risk securities or when the collateral is held directly by the reinsurer, the Fund will be subject to the risk of non-payment of scheduled principal and interest on such collateral. Such non-payments and defaults may reduce the income to the Fund and negatively impact the value of Fund Shares.
Foreign Investing Risk. The Fund may invest directly or indirectly in reinsurance-related securities issued by foreign sovereigns and foreign entities that are corporations, partnerships, trusts or other types of business entities. Because the majority of reinsurance-related security issuers are domiciled outside the United States, the Fund will normally invest significant amounts of its assets in non-U.S. entities. Accordingly, the Fund may invest without limitation in securities issued by non-U.S. entities, including those in emerging market countries. Certain SPVs in which the Fund invests may be sponsored by non-U.S. insurers that are not subject to the same regulation as that to which U.S. insurers are subject. Such SPVs may pose a greater risk of loss, for example, due to less stringent underwriting and/or risk-retention requirements. The Fund’s investments will consist primarily of event-linked bonds, Quota Share Notes, Excess of Loss Notes and ILW Notes that provide the Fund with contractual rights under the terms of the issuance. While the contractual rights of such instruments are similar whether they are issued by a U.S. issuer or a non-U.S. issuer, there may be certain additional risks associated with non-U.S. issuers.

Currency Risk. It is expected that a substantial portion of the Fund’s direct or indirect investments in reinsurance-related securities will be U.S. dollar denominated investments. To the extent the Fund invests in non-U.S. dollar denominated instruments, a change in the value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency. If the U.S. dollar rises in value against a foreign currency, a security denominated in that currency will be worth less in U.S. dollars and if the U.S. dollar decreases in value against a foreign currency, a security denominated in that currency will be worth more in U.S. dollars. Currency risk also includes the risk that a currency to which the Fund has obtained exposure through hedging declines in value relative to the currency being hedged, in which event the Fund may realize a loss both on the hedging instrument and on the currency being hedged. Currency exchange rates can fluctuate significantly for many reasons. Derivative transactions in foreign currencies (such as futures, forwards, options and swaps) may involve leverage risk in addition to currency risk. Some countries have and may continue to adopt internal economic policies that affect their currency valuations in a manner that may be disadvantageous for U.S. investors or U.S. companies seeking to do business in those countries.

Equity Investing Risk. The Fund may at times invest directly or indirectly in equity securities, which may be publicly or privately offered. The equity securities in which the Fund invests may be more volatile than the equity markets as a whole. Equity investing risk is the risk that the value of equity instruments to which the Fund is exposed will fall due to general market or economic conditions; overall market changes; local, regional or global political, social or economic instability; currency, interest rate and commodity price fluctuations; perceptions regarding the industries in which the issuers participate, and the particular circumstances and performance of the issuers. Market conditions may affect certain types of equity securities to a greater extent than other types. Although equities have historically generated higher average returns than debt securities over the long term, equity securities also have experienced significantly more volatility in returns. Finally, the prices of equities are also sensitive to rising interest rates, as the costs of capital rise and borrowing costs increase.

Subsidiary Risk. By investing through a Subsidiary, the Fund is exposed to the risks associated with a Subsidiary’s investments. Subsidiaries are not registered as investment companies under the 1940 Act and are not subject to all of the investor protections of the 1940 Act, although each Subsidiary is managed pursuant to the compliance policies and procedures of the Fund applicable to it. Changes in the laws of the United States and/or the jurisdiction in which a Subsidiary is organized could result in the inability of the Fund and/or a Subsidiary to operate as described in this prospectus and could adversely affect the Fund.

Non-Diversification Risk. The Fund is classified as a “non-diversified” fund under the 1940 Act. Accordingly, the Fund may invest a greater portion of its assets in the securities of a single issuer than if it were a “diversified” fund. To the extent that the Fund invests a higher percentage of its assets in the securities of a single issuer, the Fund is subject to a higher degree of risk associated with and developments affecting that issuer than a fund that invests more widely.
Market Risk. The value of the Fund’s investments may decline, sometimes rapidly or unpredictably, due to general economic conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic or political conditions throughout the world, changes in interest or currency rates or adverse investor sentiment generally. The value of the Fund’s investments also may decline because of factors that affect a particular industry or industries.

Management and Operational Risk. The Fund is subject to management risk because it relies on the Adviser’s ability to achieve its investment objective. The Fund runs the risk that the Adviser’s investment techniques will fail to produce desired results and cause the Fund to incur significant losses. The Adviser may select investments that do not perform as anticipated by the Adviser, may choose to hedge or not to hedge positions at disadvantageous times and may fail to use derivatives effectively.

Any imperfections, errors, or limitations in quantitative analyses and models used by the Adviser as part of its investment process could affect the Fund’s performance.

The Fund also is subject to the risk of loss as a result of other services provided by the Adviser and other service providers, including pricing, administrative, accounting, tax, legal, custody, transfer agency and other services. Operational risk includes the possibility of loss caused by inadequate procedures and controls, human error and cyber attacks, disruptions and failures affecting, or by, a service provider.

Tax Risk. The Fund intends to qualify for treatment as a regulated investment company (“RIC”) under Subchapter M of Chapter I of the Internal Revenue Code of 1986, as amended (the “Code”). In order to qualify for such treatment, the Fund must derive at least 90% of its gross income each taxable year from qualifying income, meet certain asset diversification tests at the end of each fiscal quarter, and distribute at least 90% of its investment company taxable income. The Fund’s investment strategy will potentially be limited by its intention to qualify for treatment as a RIC. The tax treatment of certain of the Fund’s investments under one or more of the qualification or distribution tests applicable to RICs is not certain. An adverse determination or future guidance by the IRS might affect the Fund’s ability to qualify for such treatment.

If, in any year, the Fund were to fail to qualify for treatment as a RIC under the Code for any reason, and were not able to cure such failure, the Fund would be subject to tax on its taxable income at corporate rates, and all distributions from earnings and profits, including any distributions of net tax-exempt income and net long-term capital gains, would be taxable to shareholders as ordinary income.

Repurchase Offers Risk. As described under “Periodic Repurchase Offers” below, the Fund is an “interval fund.” In order to provide liquidity to shareholders, the Fund, subject to applicable law, conducts quarterly repurchase offers of the Fund’s outstanding Shares at NAV, subject to approval of the Board. In all cases such repurchases will be for at least 5% and not more than 25%, and are currently expected to be for 5%, of its outstanding Shares at NAV, pursuant to Rule 23c-3 under the 1940 Act. The Fund believes that these repurchase offers are generally beneficial to the Fund’s shareholders, and repurchases generally will be funded from available cash or sales of portfolio securities. However, repurchase offers and the need to fund repurchase obligations may affect the ability of the Fund to be fully invested or may force the Fund to maintain a higher percentage of its assets in liquid investments, which may harm the Fund’s investment performance. Moreover, diminution in the size of the Fund through repurchases may result in untimely sales of portfolio securities (with associated imputed transaction costs, which may be significant), and may limit the ability of the Fund to participate in new investment opportunities or to achieve its investment objective. If the Fund employed investment leverage, repurchases of Shares would compound the adverse effects of leverage in a declining market. In addition, if the Fund borrows to finance repurchases, interest on that borrowing will negatively affect shareholders who do not tender their Shares by increasing the Fund’s expenses and reducing any net investment income. If a repurchase offer is oversubscribed the Fund will repurchase the Shares tendered on a pro rata basis, and shareholders will have to wait until the next repurchase offer to make another repurchase request. As a result,
shareholders may be unable to liquidate all or a given percentage of their investment in the Fund during a particular repurchase offer. Some shareholders, in anticipation of proration, may tender more Shares than they wish to have repurchased in a particular quarter, thereby increasing the likelihood that proration will occur. A shareholder may be subject to market and other risks, and the NAV of Shares tendered in a repurchase offer may decline between the Repurchase Request Deadline and the date on which the NAV for tendered Shares is determined. In addition, the repurchase of Shares by the Fund may be a taxable event to shareholders.

**Expense Risk.** Your actual costs of investing in the Fund may be higher than the expenses shown in “Annual Fund Operating Expenses” for a variety of reasons.

**Anti-Takeover Provisions.** The Fund’s Amended and Restated Agreement and Declaration of Trust, together with any amendments thereto, includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status.
FUND EXPENSES

The following table describes the fees and expenses you may pay if you buy and hold Shares of the Fund.

**Shareholder Transaction Expenses**
(fees paid directly from your investment)

- Maximum Repurchase Fee\(^{(1)}\) .......................................................... 2.00%

**Annual Fund Operating Expenses**
(as a percentage of net assets attributable to the Shares)

- Management Fees ................................................................... 2.00%
- Interest Payments on Borrowed Funds ................................................... 0.01%
- Service Fees ....................................................................... 0.10%
- Other Expenses\(^{(2)}\) ................................................................... 0.15%
- Acquired Fund Fees and Expenses\(^{(3)}\) .................................................... 0.16%

Total Annual Fund Operating Expenses .................................................. 2.42%

---

\(^{(1)}\) The Fund does not currently charge a repurchase fee. However, the Fund may charge a repurchase fee of up to 2.00%, which the Fund would retain to help offset non-de minimis estimated costs related to the repurchase.

\(^{(2)}\) “Other Expenses” are based on actual amounts incurred during the Fund’s prior fiscal year.

\(^{(3)}\) Represents fees and expenses of the funds in which the Fund invested during the fiscal year ended October 31, 2016. It is based on the assets invested in each fund and the fees and expenses including incentive fees or allocations charged by each fund. The fund in which the Fund invests typically charges 15% of net profits as an incentive fee or allocation. Amounts incurred by the Fund may be substantially higher or lower in the future because the performance of the funds may fluctuate and the Fund may invest in different funds from time to time.

**Example.** The following Example is intended to help you understand the various costs and expenses that you, as a holder of Shares, would bear directly or indirectly. The Example assumes that you invest $1,000 in Shares of the Fund for the time periods indicated. Because there are no costs to you associated with repurchases of your Shares, your costs would be the same whether you hold your Shares or tender your Shares for repurchase at the end of the time periods indicated. The Example also assumes that your investment has a 5% return each year, that all dividends and distributions are reinvested at NAV, and that the Fund’s operating expenses (as described above) remain the same. The Example should not be considered a representation of the Fund’s future expenses. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

The consolidated financial highlights table set forth below is intended to help you understand the Fund’s recent financial performance. The consolidated financial highlights include the accounts of the Stone Ridge Reinsurance Risk Premium Interval Sub Fund Ltd, a Subsidiary. Information contained in the table below under the headings “Per Share Data” and “Supplemental Data and Ratios” show the operating performance of the Fund from the commencement of the Fund’s investment operations on December 9, 2013 through October 31, 2016. This information has been derived from the Fund’s financial statements, which have been audited by Ernst & Young, LLP, an independent registered public accounting firm, whose report, along with this information and additional Fund performance and portfolio information, appears in the Fund’s Annual Report for the period ended October 31, 2016. To request the Fund’s Annual Report, please call (855) 609-3680.

(1) The Fund commenced operations on December 9, 2013.
(2) Net investment income (loss) per share has been calculated based on average shares outstanding during the period.
(3) Not annualized.
(4) Annualized.
(5) Total return represents the rate that an investor would have earned (or lost) on an investment in the Fund (assuming the reinvestment of all dividends and distributions).
THE FUND

The Stone Ridge Reinsurance Risk Premium Interval Fund (the “Fund”) is a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The Fund was organized as a Delaware statutory trust on July 17, 2013, pursuant to a Certificate of Trust. The Fund’s principal office is located at 510 Madison Avenue, 21st Floor, New York, New York 10022.

USE OF PROCEEDS

The Fund will invest the proceeds of the offering of shares (“Shares”) in accordance with its investment objective and policies as stated below. It is currently anticipated that the Fund will be able to invest all or substantially all of the net proceeds according to its investment objective and policies within approximately one to three months after receipt of the proceeds, depending on the amount and timing of proceeds available to the Fund as well as the availability of investments consistent with the Fund’s investment objective and strategies. Pending investment of the net proceeds, the Fund will invest in high quality, short-term debt securities, cash and/or cash equivalents.

INVESTMENT OBJECTIVE, POLICIES AND RISKS

When used in this prospectus, the term “invest” includes both direct investing and indirect investing and the term “investments” includes both direct investments and indirect investments. For example, the Fund may invest indirectly by investing in derivatives or through one or more wholly-owned and controlled subsidiaries (each, a “Subsidiary”). The Fund may be exposed to the different types of investments described below through its investments in a Subsidiary. The allocation of the Fund’s portfolio in a Subsidiary will vary over time and might not always include all of the different types of investments described herein.

INVESTMENT OBJECTIVE

The Fund’s investment objective is to achieve long-term capital appreciation. There can be no assurance that the Fund will achieve its investment objective.

PRINCIPAL INVESTMENT POLICIES

The Fund pursues its investment objective by investing primarily in reinsurance-related securities, including event-linked bonds, Quota Share Notes, Excess of Loss Notes, ILW Notes and, to a lesser extent, event-linked swaps, equity securities (publicly or privately offered) and the derivatives of equity securities of companies in the reinsurance and insurance industry (collectively, “reinsurance-related securities”). Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in reinsurance-related securities. Reinsurance-related securities typically are “high-yield” or below investment-grade or are unrated. Reinsurance-related debt securities that are below investment-grade may be referred to as “junk bonds.” Accordingly, the Fund’s portfolio will be primarily invested in high yield, high risk securities. High yield securities typically are of below investment grade quality and have below investment grade credit ratings, which ratings are associated with securities having high risk, speculative characteristics. High yield securities may also include securities that are not rated. Stone Ridge Asset Management LLC (the “Adviser”) has broad discretion to allocate the Fund’s assets among these investment categories. The Fund may invest in reinsurance-related securities across the high yield spectrum, but generally intends to focus its investments in higher yielding, higher risk securities within the below investment-grade category. The Fund has no limit as to the maturity of the securities in which it invests or as to the market capitalization of the issuer. To the extent consistent with the repurchase liquidity requirement of an interval fund, the Fund may invest without limitation in illiquid securities.

Event-linked bonds are variable rate debt securities for which the return of principal and payment of interest are contingent on the non-occurrence of a specified trigger event(s) that leads to economic and/or human loss, such as an earthquake of a particular magnitude or a hurricane of a specific category. The most common type of event-
linked bonds is known as “catastrophe” or “CAT” bonds. The Fund may invest in event-linked bonds in one or more of three ways: the Fund may purchase event-linked bonds when initially offered; the Fund may purchase event-linked bonds in the secondary, over-the-counter market; or the Fund may gain indirect exposure to event-linked bonds using derivatives. The Fund may pursue other types of event-linked derivative strategies using derivative instruments that are typically contingent, or formulaically related to defined trigger events.

Trigger events may include hurricanes, earthquakes and weather-related phenomena, non-natural catastrophes, such as plane crashes, or other events resulting in a specified level of physical or economic loss, such as mortality or longevity. Trigger events are typically defined by three criteria: an event; a geographic area in which the event must occur; and a threshold of economic or physical loss (either actual or modeled) caused by the event, together with a method to measure such loss. In order for a trigger event to be deemed to have occurred, each of the three criteria must be satisfied while the bond is outstanding or the derivative position remains open. The Fund has no limit as to the types of events, geographic areas or thresholds of loss referenced by event-linked bonds in which it can invest. Generally, the event is either a natural or non-natural peril of a kind that results in significant physical or economic loss. Natural perils include disasters such as hurricanes, earthquakes, windstorms, fires and floods. Non-natural perils include disasters resulting from human activity such as commercial and industrial accidents or business interruptions. Some event-linked bonds reference only a single event. Other event-linked bonds may reference multiple events, the occurrence of any one (or other number) of which would satisfy these criteria. Alternatively, an event-linked bond may not specify a particular peril. In these cases, only the geographic area and threshold of physical or economic loss determines whether a trigger event has occurred.

If the trigger event(s) occurs prior to a bond’s maturity or prior to the Fund’s closing out a derivative position, the Fund may lose all or a portion of its principal and forgo additional interest. In this regard, event-linked bonds typically have a special condition that states that if the sponsor suffers a loss from a particular pre-defined catastrophe or other event that results in physical and/or economic loss, then the issuer’s obligation to pay interest and/or repay the principal is either deferred or completely forgiven. For example, if the Fund holds a bond that covers a sponsor’s losses due to a hurricane with a “trigger” at $1 billion and a hurricane hits causing $1 billion or more in losses to such sponsor, then the Fund will lose all or a portion of its principal invested in the bond and forgo all or a portion of any future interest payments. If the trigger event(s) does not occur, the Fund will recover its principal plus interest. Interest typically accrues and is paid on a quarterly basis for the specified duration of the bond, as long as the trigger event(s) does not occur. Although principal typically is repaid only on the maturity date, it may be repaid in installments, depending on the terms of the bond.

When selecting event-linked bonds, Quota Share Notes and other reinsurance-related securities for investment, the Adviser evaluates the evolving universe of reinsurance-related securities by performing its own analysis based on quantitative and qualitative research. The Adviser may rely upon information and analysis obtained from brokers, dealers and ratings organizations, among other sources. The Adviser then uses quantitative and qualitative analysis to select appropriate reinsurance-related securities within each trigger-event category. Trigger event categories include “indemnity triggers,” which are tied to the losses of the issuer; “parametric triggers,” which are tied to the non-occurrence of specific events with defined parameters; “industry loss triggers,” which are tied to industry-wide losses; and “modeled loss triggers,” which are tied to the hypothetical losses resulting from a modeled event and could be issuer-specific or industry-wide. Certain investments may have multiple triggers or a combination of the different types of triggers. The Adviser’s qualitative and quantitative analysis may consider various factors, such as trigger transparency, sponsor basis risk, call provisions, moral hazard, and correlation with other investments, and will also guide the Adviser in determining the desired allocation of reinsurance-related securities by peril and geographic exposure.

The reinsurance-related securities in which the Fund typically invests are preferred shares or notes issued by a special purpose vehicle (“SPV”) whose performance is tied to underlying reinsurance transaction(s), including Quota Share Notes, Excess of Loss Notes and ILW Notes. The Fund, as holder of a note or preferred share issued by the SPV, would be entitled to participate in the underwriting results and investment earnings associated with the SPV’s underlying reinsurance contracts.
Because most event-linked bonds are rated below investment grade and most Quota Share Notes, Excess of Loss Notes and ILW Notes are unrated, a substantial portion of the Fund’s assets may be invested in below investment grade securities, similar in some respects to high yield corporate bonds. Event-linked catastrophe bonds, Quota Share Notes, Excess of Loss Notes and ILW Notes are exposed to catastrophic insurance risk, whereas high yield bonds are typically exposed to the potential default of financially distressed issuers. The Fund has no limit as to the maturity of the reinsurance-related securities in which it invests or as to the market capitalization of the issuer. The Fund may invest in event-linked bonds, Quota Share Notes, Excess of Loss Notes, ILW Notes and debt securities of any credit rating, including those rated below investment grade or, if unrated, determined by the Adviser to be of comparable quality. With respect to event-linked bonds, the rating, if any, primarily reflects the rating agency’s calculated probability that a pre-defined trigger event(s) will occur, as well as the overall expected loss to the bond principal. In addition to ratings issued by rating agencies, event-linked bonds are generally issued with an attachment probability and expected loss percentage determined by an independent modeler (a “risk model”). A risk model is created based on historical data and averages as well as scientific and probabilistic analysis and is used to inform investors and others on the potential impact of a wide variety of catastrophic events or other specified events that result in physical and/or economic loss. The Adviser, in selecting investments for the Fund, will generally consider risk models created by independent third parties, the sponsor of a reinsurance-related security or a broker. The Adviser may also consider its own risk models based on comparable prior transactions, quantitative analysis, and industry knowledge.

In implementing the Fund’s investment strategy, Stone Ridge will seek to invest in reinsurance-related securities tied to a varied group of available perils and geographic regions. Further, within each region and peril, Stone Ridge seeks to hold a balance of exposures to underlying insurance and reinsurance carriers, trigger types, and lines of business. The Adviser will continue to monitor the risk of the Fund’s investments on a regular basis.

Many of the reinsurance-related securities in which the Fund will invest will be issued by non-U.S. issuers. As a result, the Fund may invest substantially in securities issued by foreign sovereigns or by U.S. or foreign entities that are corporations, partnerships, trusts or other types of business entities.

Under normal circumstances, the Fund intends to invest substantially all its assets in reinsurance-related securities. The Fund retains the flexibility, however, to invest in other instruments as the Adviser may consider appropriate from time to time, including registered investment companies, U.S. government securities, cash and cash equivalents. The Fund may also enter into other types of investments that enable the Fund to provide risk transfer services, as the Adviser may consider appropriate from time to time. The Fund may make investments in reinsurance-related securities directly or indirectly through one or more Subsidiaries. Each Subsidiary may invest in reinsurance-related securities or any other security or other instrument that the Fund may hold directly. The Fund may invest up to 25% of its assets (at the time of purchase) in a Subsidiary. References herein to the Fund include references to a Subsidiary in respect of the Fund’s exposure to reinsurance-related securities.

Reinsurance-Related Securities

The Fund will invest substantially in reinsurance-related securities, including “event-linked” bonds, a type of reinsurance-related security, which sometimes are referred to as “insurance-linked” or “catastrophe” bonds, Quota Share Notes, ILW Notes and Excess of Loss Notes.

Event-Linked Bonds. Event-linked bonds are variable rate debt securities for which the return of principal and payment of interest are contingent on the non-occurrence of a specified trigger event(s) that leads to economic and/or human loss, such as an earthquake of a particular magnitude or a hurricane of a specific category. In most cases, the trigger event(s) will not be deemed to have occurred unless the event(s) happened in a particular geographic area and was of a certain magnitude (based on independent scientific readings) and/or caused a certain amount of actual or modeled loss. Geographic areas identified by event-linked bonds range broadly in scope. A limited number of event-linked bonds do not identify a geographic area, meaning that the event can occur anywhere. The majority of event-linked bonds relate to events occurring within the United States (or a single state or group of states within the United States), Europe (or a single European country) or Japan. Event-
linked bonds also identify a threshold of physical or economic loss. The trigger event is deemed to have occurred only if the event meets or exceeds the specified threshold of physical or economic loss. Some event-linked bonds base the occurrence of the trigger event on losses reported by a specific insurance company or by the insurance industry. Other event-linked bonds base the occurrence of the trigger event on modeled payments (for a single insurer or across the insurance industry), an industry index or indices, or readings of scientific instruments. Some event-linked bonds utilize a combination of the aforementioned thresholds. The Fund is entitled to receive principal and interest payments so long as no trigger event(s) occurs of the description and magnitude specified by the instrument. Event-linked bonds may be sponsored by government agencies, insurance companies, reinsurers, special purpose corporations or other on-shore or off-shore entities. Event-linked bonds are typically rated by at least one nationally recognized statistical rating agency, but also may be unrated. The rating for an event-linked bond, if any, primarily reflects the rating agency’s calculated probability that a pre-defined trigger event(s) will occur. This rating also reflects the event-linked bond’s credit risk and the model used to calculate the probability of a trigger event.

If a “sponsor,” such as an insurance company or reinsurance company (a company that insures insurance companies), wants to transfer some or all of the risk it assumes in insuring against certain losses, it can set up a separate legal structure — commonly known as an SPV. Municipal, state and foreign governments and private companies may also sponsor catastrophe bonds as a hedge against natural or non-natural disasters. The SPV is a passive and independent intermediary structure standing between the bond holders and the sponsor. Immediately after issuing the bonds to investors, the SPV enters into a “cover agreement” with the sponsor, through which the SPV provides the sponsor with a measure of protection against specified catastrophic or other similar events. The SPV generally puts the proceeds received from the bond issuance (the “principal”) into a trust account. The SPV uses this principal amount as “collateral” in order to secure its obligation under the cover agreement. The principal amount from the bond issuance held as collateral is generally invested into high-quality instruments (such as U.S. Treasury securities or U.S. Treasury money market funds). The earnings on these high quality instruments, as well as insurance premiums paid by the sponsor, are used to make periodic, variable rate interest payments to investors (e.g., the Fund). The reinsurance-related securities typically have rates of interest that reflect the returns of such short-term collateral investments, plus a premium.

As long as the corresponding trigger event(s) covered by the bond — whether a windstorm in Europe or an earthquake in California — does not occur during the time investors own the bond, investors will receive their interest payments and, when the bond matures, their principal back from the SPV. Many catastrophe bonds mature in three years, although terms generally range from one to five years, depending on the bond. If the event does occur, however, the sponsor’s right to the collateral is “triggered.” This means the sponsor receives the collateral, instead of investors receiving it when the bond matures, causing investors to lose most — or all — of their principal and unpaid interest payments. When this happens, the SPV might also have the right to extend the maturity of the bonds to verify that the trigger did occur or to process and audit insurance claims. Depending on the bond, the extension can last anywhere from three months to two years or more.

Other Event-Linked Securities. The Fund may also seek to gain exposure to reinsurance contracts by holding notes or preferred shares issued by an SPV whose performance is tied to underlying reinsurance transaction(s). In implementing the Fund’s investment strategy, Stone Ridge will seek to invest in reinsurance-related securities tied to a varied group of available perils and geographic regions. Further, within each region and peril, Stone Ridge seeks to hold a balance of exposures to underlying insurance and reinsurance carriers, trigger types, and lines of business.

Illiquid and Restricted Securities

The Fund’s investments in illiquid securities may be substantial. The Board has delegated to Stone Ridge the responsibility for determining whether the securities in which the Fund invests are liquid or illiquid, which Stone Ridge carries out on a case-by-case basis based on procedures approved by the Board that set forth various factors relating to the Fund’s ability to dispose of such securities in an appropriate manner. Certain of the instruments in which the Fund may invest, including most event-linked bonds, Quota Share Notes, Excess of
Loss Notes and ILW Notes are restricted securities in that their disposition is restricted by the federal securities laws or otherwise, such as securities offered privately pursuant to Section 4(a)(2) of the Securities Act of 1933 (the “1933 Act”) and securities issued pursuant to Rule 144A under the 1933 Act. Notwithstanding these limitations on resale, certain restricted securities may be treated as liquid if the Adviser determines pursuant to the applicable procedures that such treatment is warranted. The Fund’s Board will monitor and periodically review liquidity determinations. For certain risks related to the Fund’s investments in illiquid instruments, see “Risk Considerations — Illiquidity and Restricted Securities Risk” below.

**Below Investment Grade Securities**

Because most event-linked bonds are rated below investment grade and most Quota Share Notes, Excess of Loss Notes and ILW Notes are unrated, a substantial portion of the Fund’s assets may be invested in below investment grade securities, similar in some respects to high yield corporate bonds. Event-linked catastrophe bonds, Quota Share Notes, Excess of Loss Notes and ILW Notes are exposed to catastrophic insurance risk, whereas high yield bonds are typically exposed to the potential default of financially distressed issuers. The Fund has no limit as to the maturity of the securities in which it invests or as to the market capitalization of the issuer. The Fund may invest in event-linked bonds, Quota Share Notes, Excess of Loss Notes, ILW Notes and debt securities of any credit rating, including those rated below investment grade (commonly referred to as “junk bonds”) or, if unrated, determined by the Adviser, to be of comparable quality. With respect to event-linked bonds, the rating, if any, primarily reflects the rating agency’s calculated probability that a pre-defined trigger event(s) will occur, as well as the overall expected loss to the bond principal. In addition to ratings issued by rating agencies, event-linked bonds are generally issued with an attachment probability and expected loss percentage determined by an independent modeler (a “risk model”). A risk model is created based on historical data and averages as well as scientific and probabilistic analysis and is used to inform investors and others on the potential impact of a wide variety of catastrophic events or other specified events that result in physical and/or economic loss. The Adviser, in selecting investments for the Fund, will generally consider risk models created by independent third parties, the sponsor of a reinsurance-related security or a broker. The Adviser may also consider its own risk models based on comparable prior transactions, quantitative analysis, and industry knowledge. The event-linked bonds in which the Fund may invest may also be subordinated or “junior” to more senior securities of the issuer. The investor in a subordinated security of an issuer is generally entitled to payment only after other holders of debt in that issuer have been paid.

A substantial amount of the reinsurance-related securities in which the Fund intends to invest are expected to be structured as variable rate, or floating-rate, debt securities, which will be secured by the collateral contributed by the Fund and other investors to the relevant SPVs sponsored by the ceding insurer. The collateral is typically invested in short-term instruments, such as U.S. Treasury securities or U.S. Treasury money market funds. The reinsurance-related securities typically have rates of interest that reflect the returns of such short-term collateral instruments, plus a premium.

**Derivatives**

The Fund may enter into derivatives transactions with respect to any security or other instrument in which it is permitted to invest or any security, instrument, index or economic indicator related to such instruments (“reference instruments”). Derivatives are financial instruments the value of which is derived from an underlying reference instrument. Derivatives transactions can involve substantial risk. Derivatives typically allow the Fund to increase or decrease the level of risk to which it is exposed more quickly and efficiently than transactions in other types of instruments. The Fund incurs costs in connection with opening and closing derivatives positions. The Fund may engage in the derivative transactions set forth below, as well as in other derivative transactions with substantially similar characteristics and risks. The Fund may but is not required to use futures and options on securities, indices and currencies, forward foreign currency exchange contracts, stock index futures, swaps, including event-linked swaps and other derivative instruments. The Fund may use derivatives for a variety of purposes, including (i) as a hedge against adverse changes in the market prices of securities, interest rates or, to a
lesser extent, currency exchange rates, (ii) as a substitute for purchasing or selling securities, (iii) to seek to increase the Fund’s return as a non-hedging strategy that may be considered speculative, or (iv) to manage portfolio exposures.

Derivative transactions may give rise to a form of leverage. Leverage may cause the Fund to be more volatile than if it had not been leveraged, as certain types of leverage may exaggerate the effect of any increase or decrease in the value of the Fund’s portfolio securities. The loss on leverage transactions may substantially exceed the initial investment. The Fund may be required to segregate or “earmark” liquid assets or otherwise cover the Fund’s obligation created by a transaction that gives rise to leverage.

Non-U.S. Investments

The Fund may invest directly or indirectly without limit in foreign government and foreign corporate debt securities. Because the majority of reinsurance-related security issuers are domiciled outside the United States, the Fund will normally invest significant amounts of its assets in foreign securities. Non-U.S. issuers are issuers that are organized and/or have their principal offices outside of the United States. Non-U.S. securities may be issued by non-U.S. governments, banks or corporations, private issuers, or certain supranational organizations, such as the World Bank and the European Union.

U.S. Government Securities

The Fund may invest in U.S. government securities, which are obligations of, or guaranteed by, the U.S. government, its agencies or government-sponsored entities. U.S. government securities include issues by non-governmental entities (like financial institutions) that carry direct guarantees from U.S. government agencies as part of government initiatives. Although the U.S. government guarantees principal and interest payments on securities issued by the U.S. government and some of its agencies, such as securities issued by the Government National Mortgage Association (Ginnie Mae), this guarantee does not apply to losses resulting from declines in the market value of these securities. Some of the U.S. government securities that the Fund may hold are not guaranteed or backed by the full faith and credit of the U.S. government, such as those issued by Fannie Mae and Freddie Mac.

Equity Securities

Equity securities include common stocks, warrants and rights, as well as “equity equivalents” such as preferred stocks and securities convertible into common stock. The equity securities in which the Fund invests may be publicly or privately offered. Preferred stocks generally pay a dividend and rank ahead of common stocks and behind debt securities in claims for dividends and for assets of the issuer in a liquidation or bankruptcy. The dividend rate of preferred stocks may cause their prices to behave more like those of debt securities. A convertible security is one that can be converted into or exchanged for common stock of an issuer within a particular period of time at a specified price, upon the occurrence of certain events or according to a price formula. Convertible securities offer the Fund the ability to participate in equity market movements while also seeking some current income. Convertible debt securities pay interest and convertible preferred stocks pay dividends until they mature or are converted, exchanged or redeemed. The Fund considers some convertible securities to be “equity equivalents” because they are convertible into common stock. The credit ratings of those convertible securities generally have less impact on the investment decision, although they may still be subject to credit and interest rate risk.

Leverage

The Fund may obtain leverage through borrowings in seeking to achieve its investment objective. The Fund’s borrowings may be on a secured or unsecured basis and at fixed or variable rates of interest. The 1940 Act requires a closed-end fund to maintain asset coverage of at least 300% of the value of the outstanding amount of senior securities representing indebtedness (as defined in the 1940 Act). This means that the value of
the Fund’s senior securities representing indebtedness may not exceed one-third of the value of its total assets (including such senior securities), measured at the time the Fund issues the senior securities. The Fund also may borrow money from banks or other lenders for temporary purposes in an amount not to exceed 5% of the Fund’s assets. Such temporary borrowings are not subject to the asset coverage requirements discussed above in connection with the Fund’s borrowings for investment purposes. Investments or trading practices that involve contractual obligations to pay in the future are subject to the same requirements unless the Fund designates liquid assets in an amount the Fund believes to be equal to the Fund’s contractual obligations (marked-to-market on a daily basis) or appropriately “covers” such obligations with offsetting positions.

Leverage can have the effect of magnifying the Fund’s exposure to changes in the value of its assets and may also result in increased volatility in the Fund’s NAV. This means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund owned its assets on an unleveraged basis. The value of an investment in the Fund will be more volatile and other risks tend to be compounded if and to the extent that the Fund is exposed to leverage directly or indirectly.

**Reverse Repurchase Agreements**

The Fund may enter into reverse repurchase agreements pursuant to which the Fund transfers securities to a counterparty in return for cash and agrees to repurchase the securities at a later date and for a higher price. Reverse repurchase agreements are treated as borrowings by the Fund, are a form of leverage and may make the value of an investment in the Fund more volatile and increase the risks of investing in the Fund. Entering into reverse repurchase agreements and other borrowing transactions may cause the Fund to liquidate positions at a disadvantageous time or price in order to satisfy its obligations or meet segregation requirements. Borrowing money involves transaction and interest costs. The Fund may pay a commitment fee or other fees to maintain a line of credit, and will pay interest on amounts it borrows.

To the extent required by Commission guidelines, if a transaction (such as a reverse repurchase agreement) exposes the Fund to an obligation to another party it will either: (1) enter an offsetting (“covered”) position for the same type of financial asset; or (2) segregate cash or liquid securities on the books of the custodian with a value sufficient at all times to cover its potential obligations. Assets used as cover or segregated cannot be sold while the position(s) requiring cover is open unless replaced with other appropriate assets.

**Subsidiaries**

The assets of the Fund may be invested through one or more Subsidiaries, which, like the Fund, invest in reinsurance-related securities. The Fund does not expect to invest more than 25% of its assets (at the time of purchase) in a Subsidiary. Under an investment management agreement with a Subsidiary, the Adviser provides a Subsidiary with the same type of management services as the Adviser provides to the Fund. If the Adviser receives compensation for providing such services to a Subsidiary, the Adviser will not receive compensation from the Fund in respect of the assets of the Fund that are invested in a Subsidiary. The Fund does not currently intend to sell or transfer all or any portion of its ownership interest in a Subsidiary. The Fund reserves the right to establish an additional subsidiary or subsidiaries, subject to the approval of the Board of Trustees.

**Changes to the Fund’s Investment Policies**

The Fund’s investment objective and policies may be changed without shareholder approval unless an objective or policy is identified in the prospectus or in the Statement of Additional Information as “fundamental.” The Fund’s policy to invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in reinsurance-related securities may be changed by the Board upon at least 60 days prior written notice to shareholders.
Cash Management and Temporary Investments

Normally, the Fund invests substantially all of its assets to meet its investment objective. The Fund may invest the remainder of its assets in securities with remaining maturities of less than one year or cash equivalents, or may hold cash. For temporary defensive purposes, including during periods of unusual cash flows, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or may hold cash. The Fund may adopt a defensive strategy when the Adviser believes securities in which the Fund normally invests have special or unusual risks or are less attractive due to adverse market, economic, political or other conditions.

Additional Investment Practices

In addition to the principal investment strategies described above, the Fund may also use other investment techniques, including the following from time to time.

Short-Term Trading. At times, the Fund may engage in short-term trading, usually with respect to certain derivative instruments on the types of instruments the Fund is permitted to hold in its portfolio. If the Fund engages in frequent short-term trading, it may incur additional operating expenses, which would reduce performance, and could cause shareholders to incur a higher level of taxable income or capital gains.

Securities Lending. The Fund may earn additional income from lending securities. The value of securities loaned may not exceed $\frac{33}{3}$% of the value of the Fund’s total assets, which includes the value of collateral received. To the extent the Fund loans a portion of its securities, the Fund will generally receive collateral consisting of cash or U.S. government securities. Collateral received will be marked to market daily and will generally be at least equal at all times to the value of the securities on loan. Subject to its stated investment policies, the Fund will generally invest cash collateral received for the loaned securities in securities of the U.S. Government or its agencies, repurchase agreements collateralized by securities of the U.S. Government or its agencies, and unaffiliated registered and unregistered money market funds. For purposes of this paragraph, agencies include both agency debentures and agency mortgage backed securities.

Investments in Other Investment Companies. The Fund may invest in the securities of other investment companies, which can include open-end funds, closed-end funds, unit investment trusts and business development companies. The Fund may invest in exchange-traded funds (ETFs), which are typically open-end funds or unit investment trusts listed on a stock exchange. One reason the Fund might do so is to gain exposure to segments of the markets represented by another fund at times when the Fund might not be able to buy the particular type of securities directly. As a shareholder of an investment company, the Fund would be subject to its ratable share of that investment company’s expenses, including its advisory and administration expenses. The Fund does not intend to invest in other investment companies unless the Adviser believes that the potential benefits of the investment justify the payment of any premiums or sales charges. Absent Commission exemptive or similar relief, the Fund’s investments in the securities of other investment companies are subject to the limits that apply to those types of investments under the 1940 Act.

Corporate Debt Obligations. The Fund may purchase debt obligations, such as bonds, debentures, notes and preferred stock issued by U.S. and foreign corporations, partnerships or other business entities. Debt securities purchased by the Fund may be subordinate to other liabilities of the issuer. If a borrower becomes insolvent, the borrower’s assets may be insufficient to meet its obligations.

Portfolio Turnover

The Fund’s portfolio turnover rate for the fiscal year ended October 31, 2016 was 28.57%. A high turnover rate (100% or more) necessarily involves greater expenses to the Fund.
RISK CONSIDERATIONS

Investors should carefully consider the Fund’s risks and investment objective, as an investment in the Fund may not be appropriate for all investors and is not designed to be a complete investment program. An investment in the Fund involves a high degree of risk. The reinsurance-related securities in which the Fund invests are typically considered “high yield” and many reinsurance-related debt securities may be considered “junk bonds.” It is possible that investing in the Fund may result in a loss of some or all of the amount invested. Before making an investment/allocation decision, investors should (i) consider the suitability of this investment with respect to an investor’s or a client’s investment objectives and individual situation and (ii) consider factors such as an investor’s or a client’s net worth, income, age, and risk tolerance. Investment should be avoided where an investor/client has a short-term investing horizon and/or cannot bear the loss of some or all of the investment.

The Fund is subject to the principal risks noted below, whether through the Fund’s (i) derivatives positions, (ii) investments through a Subsidiary or (iii) direct investments. As with any investment company, there is no guarantee that the Fund will achieve its investment objective. You could lose all or part of your investment in the Fund, and the Fund could underperform other investments.

Reinsurance-Related Securities Risk. The principal risk of an investment in a reinsurance-related security is that a triggering event(s) (e.g., (i) natural events, such as a hurricane, tornado or earthquake of a particular size/magnitude in a designated geographic area; or (ii) non-natural events, such as large aviation disasters) will occur and the Fund will lose all or a significant portion of the principal it has invested in the security and the right to additional interest payments with respect to the security. If multiple triggering events occur that impact a significant portion of the portfolio of the Fund, the Fund could suffer substantial losses and an investor will lose money. A majority of the Fund’s assets will be invested directly or indirectly in reinsurance-related securities tied to natural events and/or non-natural disasters and there is inherent uncertainty as to whether, when or where such events will occur. There is no way to accurately predict whether a triggering event will occur and, because of this significant uncertainty, reinsurance-related securities carry a high degree of risk.

Event-Linked Bonds. Event-linked or catastrophe bonds carry large uncertainties and major risk exposures to adverse conditions. If a trigger event, as defined within the terms of the bond, involves losses or other metrics exceeding a specific magnitude in the geographic region and time period specified therein, the Fund may lose a portion or all of its investment in such security, including accrued interest and/or principal invested in such security. Such losses may be substantial. Because catastrophe bonds cover “catastrophic” events that, if they occur, will result in significant losses, catastrophe bonds carry a high degree of risk of loss and are considered “high yield” or “junk bonds.” The rating, if any, primarily reflects the rating agency’s calculated probability that a pre-defined trigger event will occur. Thus, lower-rated bonds have a greater likelihood of a triggering event occurring and loss to the Fund.

Catastrophe bonds, Quota Share Notes, Excess of Loss Notes and ILW Notes are also subject to extension risk. The sponsor of such an investment might have the right to extend the maturity of the bond or note to verify that the trigger event did occur or to process and audit insurance claims. The typical duration of mandatory and optional extensions of maturity for reinsurance-related securities currently is between three months to two years. In certain circumstances, the extension may exceed two years. An extension to verify the potential occurrence of a trigger event will reduce the value of the bond or note due to the uncertainty of the occurrence of the trigger event and will hinder the Fund’s ability to sell the bond or note. Even if it is determined that the trigger event did not occur, such an extension will delay the Fund’s receipt of the bond’s or note’s principal and prevent the reinvestment of such proceeds in other, potentially higher yielding securities.

Catastrophe bonds have been in use only since the mid-1990s. As a relatively new type of financial instrument, there is limited trading history for these securities, and in certain instances there may be a limited or no active trading market, which may impair the ability of the Fund to realize full value in the event of the need to liquidate such assets.
Quota Share Notes, Excess of Loss Notes and ILW Notes. The Fund may gain exposure (directly or indirectly) to reinsurance contracts through Quota Share Notes, Excess of Loss Notes and ILW Notes. These securities are subject to the same risks discussed herein for event-linked or catastrophe bonds. In addition, because Quota Share Notes, Excess of Loss Notes and ILW Notes represent an interest, either proportional or non-proportional, in one or more underlying reinsurance contracts, the Fund has limited transparency into the individual underlying contract(s) and, therefore, must rely upon the risk assessment and sound underwriting practices of the issuer. Accordingly, it may be more difficult for the Adviser to fully evaluate the underlying risk profile of the Fund’s investment in Quota Share Notes, Excess of Loss Notes and ILW Notes, which will place the Fund’s assets at greater risk of loss than if the Adviser had more complete information. The lack of transparency may also make the valuation of Quota Share Notes, Excess of Loss Notes and ILW Notes more difficult and potentially result in mispricing that could result in losses to the Fund. See “Illiquidity and Restricted Securities Risk” and “Valuation Risk” below. In Quota Share Notes trades, ILW Notes trades and Excess of Loss Notes trades, the Fund cannot lose more than the amount invested.

Risk-Modeling Risk. The Adviser, in selecting investments for the Fund, will generally consider risk models created by independent third parties, the sponsor of a reinsurance-related security or a broker. The Adviser may also consider its own risk models based on comparable prior transactions, quantitative analysis, and industry knowledge. Risk models are designed to assist investors, governments, and businesses understand the potential impact of a wide variety of catastrophic events and allow such parties to analyze the probability of loss in regions with the highest exposure. The Adviser will use the output of the risk models before and after investment to assist the Adviser in assessing the risk of a particular reinsurance-related security or a group of such securities. Risk models are created using historical, scientific and other related data, and they may use quantitative methods. Because such risk models are based in part upon historical data and averages, there is no guarantee that such information will accurately predict the future occurrence, location or severity of any particular catastrophic event and thus may fail to accurately calculate the probability of a trigger event and may underestimate the likelihood of a trigger event. Securities or other investments selected using quantitative methods may perform differently from the market as a whole or from their expected performance for many reasons, including factors used in building the quantitative analytical framework, the weights placed on each factor, and changing sources of market returns, among others. In addition, any errors or imperfections in a risk model (quantitative or otherwise), analyses, the data on which they are based or any technical issues with the construction of the models (including, for example, data problems and/or software or other implementation issues) could adversely affect the ability of the Adviser to use such analyses or models effectively, which in turn could adversely affect the Fund’s performance. Risk models are used by the Adviser as one input in its risk analysis process for Fund investments. There can be no assurance that these methodologies will help the Fund to achieve its investment objective.

Illiquidity and Restricted Securities Risk. To the extent consistent with the repurchase liquidity requirement of an interval fund, the Fund may invest without limitation in illiquid investments. Illiquidity risk is the risk that the investments held by the Fund may be difficult or impossible to sell at the time that the Fund would like or at the price that the Fund believes the security is currently worth. As a relatively new type of financial instrument, there is limited trading history for reinsurance-related securities, even for those securities deemed to be liquid. There can be no assurance that a liquid market for the Fund’s investments will be maintained. At any given time, the Fund’s portfolio may be substantially illiquid.

The Fund’s ability to realize full value in the event of the need to liquidate certain assets may be impaired and/or result in losses to the Fund. The Fund may be unable to sell its investments, even under circumstances when the Adviser believes it would be in the best interests of the Fund to do so. Illiquid investments may also be difficult to value and their pricing may be more volatile than more liquid investments, which could adversely affect the price at which the Fund is able to sell such instruments. Illiquidity risk also may be greater in times of financial stress. The risks associated with illiquid instruments may be particularly acute in situations in which the Fund’s operations require cash (such as in connection with repurchase offers) and could result in the Fund borrowing to meet its short-term needs or incurring losses on the sale of illiquid instruments.
Certain of the instruments in which the Fund may invest are subject to restrictions on resale by the federal securities laws or otherwise, such as securities offered privately pursuant to Section 4(a)(2) of the 1933 Act and securities issued pursuant to Rule 144A under the 1933 Act. While certain restricted securities may, notwithstanding their limitations on resale, be treated as liquid if the Adviser determines, pursuant to the applicable procedures, that such treatment is warranted, there can be no guarantee that any such determination will continue. Restricted securities previously determined to be liquid may subsequently become illiquid while held by the Fund. Even if such restricted securities are not deemed to be illiquid, they may nevertheless be difficult to value and the Fund may be required to hold restricted securities when it otherwise would sell such securities or may be forced to sell securities at a price lower than the price the Fund has valued such securities. This may result in losses to the Fund and investors.

Valuation Risk. The Fund is subject to valuation risk, which is the risk that one or more of the securities in which the Fund invests are priced incorrectly, due to factors such as incomplete data, market instability, or human error. In addition, pricing of reinsurance-related securities is subject to the added uncertainty caused by the inability to generally predict whether, when or where a natural disaster or other triggering event will occur. Even after a natural disaster or other triggering event occurs, the pricing of reinsurance-related securities is subject to uncertainty for a period of time until event parameters, ultimate loss amounts and other factors are finalized and communicated to the Fund. The Fund’s investments in reinsurance-related securities for which market quotations are not available will be valued pursuant to procedures adopted by the Board. Even for reinsurance-related securities for which market quotations are generally readily available, upon the occurrence or possible occurrence of a trigger event, and until the completion of the processing and auditing of applicable loss claims, the Fund’s investment in a reinsurance-related security may be priced using fair value methods. The majority of the Fund’s reinsurance-related securities are priced using fair value methods. Portfolio securities that are valued using techniques other than market quotations, including fair valued securities, may be subject to greater fluctuation in their value from one day to the next than would be the case if market quotations were used. There is no assurance that the Fund could sell a portfolio security for the value established for it at any time and it is possible that the Fund would incur a loss because a portfolio security is sold at a discount to its established value. If securities are mispriced, shareholders could lose money upon redemption or could pay too much for shares purchased.

Moral Hazard Risk. Reinsurance-related securities are generally subject to one or more types of triggers, including so-called “indemnity-triggers.” An indemnity trigger is a trigger based on the actual losses of the ceding sponsor (i.e., the party seeking reinsurance). Reinsurance-related securities subject to indemnity triggers are often regarded as being subject to potential moral hazard, since such reinsurance-related securities are triggered by actual losses of the ceding sponsor and the ceding sponsor may have an incentive to take actions and/or risks that would have an adverse effect on the Fund. For example, if an event-linked bond issued will be triggered at $500 million in losses to the sponsor, once that trigger is hit (i.e., the sponsor experiences $500 million in losses under the contracts it has written), the bond purchaser will lose all or a portion of its principal invested (plus any additional interest). In this situation, the ceding sponsor has an incentive to pay the claims more generously when the loss amount is near the trigger amount set in the bond (i.e., to claim $500 million in losses, when perhaps it could be argued that actual losses were $499.9 million). Thus, bonds with indemnity triggers may be subject to moral hazard, because the trigger depends on the ceding sponsor to properly identify and calculate losses that do and do not apply in determining whether the trigger amount has been reached. In short, “moral hazard” refers to this potential for the sponsor to influence bond performance, as payouts are based on the individual policy claims against the sponsor and the way the sponsor settles those claims.

Limited Availability and Reinvestment Risk. Investments in reinsurance-related securities may be limited, which may limit the amount of assets the Fund may be able to invest in reinsurance-related securities. The limited availability of reinsurance-related securities may be due to a number of factors, including seasonality concentration of issuances, limited selection that meets the Fund’s investment objective and lack of availability of reinsurance-related securities in the secondary market. Original issuances of event-linked bonds (and in particular hurricane-related catastrophe bonds) may be concentrated in the first two calendar quarters of each
year while original issuances of Quota Share Notes and Excess of Loss Notes may be concentrated in particular reinsurance renewal months (January, and to a lesser extent, April, June, and July). Thereafter, the availability of reinsurance-related securities is subject to natural fluctuations in the secondary market. Therefore, if reinsurance-related securities held by the Fund mature or if the Fund must sell securities to meet repurchase requests, the Fund may be required to hold more cash than it normally would until reinsurance-related securities meeting the Fund’s investment objective become available. Due to the potentially limited availability of additional reinsurance-related securities, the Fund may be forced to reinvest in securities that are lower yielding or less desirable than the securities the Fund sold. This is known as reinvestment risk, and may reduce the overall return on its portfolio securities.

Investments in Non-Voting Securities Risk. If the reinsurance-related securities in which the Fund invests carry voting rights, the Fund ordinarily will limit such investments to 5% or less of the issuing SPV’s outstanding voting securities. However, to enable the Fund to invest more of its assets in certain SPVs deemed attractive by the Adviser, the Fund may also contractually forego its right to vote securities or may purchase non-voting securities of such SPVs. If the Fund does not limit its voting rights and is deemed an “affiliate” of the SPV, the ability of the Fund to make future investments in the SPV or to engage in other transactions would be severely limited by the requirements of the 1940 Act. Such limitations may interfere with portfolio management of the Fund, which may adversely impact the Fund’s performance.

For various reasons, the Fund may hold some or all of its interest in an SPV in non-voting form. One reason for this is to avoid an SPV being deemed an “affiliated person” of the Fund for purposes of the 1940 Act. Accordingly, the Fund may agree to waive irrevocably any right that the Fund may have to vote securities in amounts in excess of 4.99% of an SPV’s outstanding voting securities. The general policy to waive voting rights has been reviewed by the Board. The waiver of the Fund’s voting rights does not facilitate investments in an SPV by the Adviser or other clients of the Adviser, either as a practical or a legal matter, and is not intended to confer any benefit on such entities. Interests in a particular SPV, even without voting rights, are selected based on the investment merits of those interests consistent with the fiduciary duties of both the Adviser and the Board, and generally reflect the judgment of the Adviser that such investments are an attractive and appropriate opportunity for the Fund for any number of reasons.

To the extent the Fund holds non-voting securities of an SPV or contractually foregoes its right to vote securities of an SPV, it will not be able to vote to the full extent of its economic interest on matters that require the approval of the investors in the SPV, including matters that could adversely affect the Fund’s investment in the SPV. This restriction could diminish the influence of the Fund in an SPV and adversely affect its investment in the SPV, which could result in unpredictable and potentially adverse effects on shareholders. Moreover, there is a risk that a court or securities regulators could disregard the statutory definition of “affiliated person,” and still treat the SPV as an affiliated person of the Fund for purposes of the 1940 Act.

Reinsurance Industry Risk. The performance of reinsurance-related securities and the reinsurance industry itself are tied to the occurrence of various triggering events, including weather, natural disasters (hurricanes, earthquakes, etc.), non-natural large catastrophes and other specified events causing physical and/or economic loss. Triggering events are typically defined by three criteria: an event; a geographic area in which the event must occur; and a threshold of economic or physical loss (either actual or modeled) caused by the event, together with a method to measure such loss. Generally, the event is either a natural or non-natural peril of a kind that results in significant physical or economic loss. Natural perils include disasters such as hurricanes, earthquakes, windstorms, fires and floods. Non-natural perils include disasters resulting from human activity, such as commercial and industrial accidents or business interruptions. Major natural disasters in populated areas (such as in the cases of hurricane Katrina in New Orleans in 2005 and super storm Sandy in the New York City metropolitan area in 2012) or related to high-value insured property (such as plane crashes) can result in significant losses and investors in reinsurance-related securities tied to such exposures may also experience substantial losses. If the likelihood and severity of natural and other large disasters increase, the risk of significant losses to reinsurers may increase. Typically, one significant triggering event (even in a major
metropolitan area) will not result in financial failure to a reinsurer. However, a series of major triggering events could cause the failure of a reinsurer. Similarly, to the extent the Fund invests in reinsurance-related securities for which a triggering event occurs, losses associated with such event will result in losses to the Fund and a series of major triggering events affecting a large portion of the reinsurance-related securities held by the Fund will result in substantial losses to the Fund. In addition, unexpected events such as natural disasters or terrorist attacks could lead to government intervention. Political, judicial and legal developments affecting the reinsurance industry could also create new and expanded theories of liability or regulatory or other requirements; such changes could have a material adverse effect on the Fund.

**Floating-Rate Instrument Risks.** A significant percentage of the reinsurance-related securities in which the Fund directly or indirectly invests are expected to be variable rate, or floating-rate, event-linked bonds. Floating-rate instruments and similar investments may be illiquid or less liquid than other investments. In addition, while the collateral securing most event-linked bonds in which the Fund currently intends to invest is typically invested in low-risk investments, certain SPVs in which the Fund invests may permit investment of collateral in higher risk, higher yielding investments. Thus, the value of collateral, if any, securing the Fund’s investments in event-linked bonds can decline or may be insufficient to meet the issuer’s obligations and the collateral, if repaid to the Fund, may be difficult to liquidate. Market quotations for these securities may be volatile and/or subject to large spreads between bid and ask prices.

**Below Investment Grade Securities and Unrated Securities Risk.** The Fund may have exposure, without limitation, to reinsurance-related securities that are rated below investment grade or that are unrated but are judged by the Adviser to be of comparable quality. Below investment grade debt securities, which are commonly called “junk bonds,” are rated below BBB- by Standard & Poor’s Ratings Services (“S&P”) or Baa3 by Moody’s Investors Service, Inc., (“Moody’s”), or have comparable ratings by another rating organization. Accordingly, certain of the Fund’s unrated investments could constitute a highly risky and speculative investment, similar to an investment in “junk bonds.”

The rating primarily reflects the rating agency’s calculated probability that a pre-defined trigger event will occur. Therefore, securities with a lower rating reflect the rating agency’s assessment of the substantial risk that a triggering event will occur and result in a loss. The rating also reflects the reinsurance-related security’s credit risk and the model used to calculate the probability of the trigger event. The rating system for reinsurance-related securities is relatively new and significantly less developed than that of corporate bonds and continues to evolve as the market develops. There is no minimum rating on the instruments in which the Fund may invest. Most rating agencies rely upon one or more of the reports prepared by the following three independent catastrophe-modeling firms: EQECAT, Inc., AIR Worldwide Corporation and Risk Management Solutions, Inc. The Adviser may also rely on reports from one or more of these modeling firms as part of its investment process or may create its own internal risk model for this purpose. Different methodologies are used to evaluate the probability of various types of pre-defined trigger events. If the reports used by the rating agency are flawed, it may cause a rating agency to assign a rating to a reinsurance-related security that is not justified. Therefore, to the extent the Adviser relies on rating agency ratings to select securities for the Fund, the Fund may be exposed to greater risks. Additionally, because there are few major independent catastrophe-modeling firms, the effects of a flawed model or report issued by one or more of such firms will be magnified. In addition, such investments may be subject to greater risks than other investments, including greater levels of risk related to changes in interest rates, credit risk (including a greater risk of default), and illiquidity risk. Below investment grade investments or unrated investments judged by the Adviser to be of comparable quality may be more susceptible to real or perceived adverse economic and competitive industry or business conditions than higher-grade investments. Yields on below investment grade investments will fluctuate and may, therefore, cause the Fund’s value to be more volatile. Certain investments of the Fund may be downgraded to below investment grade status (or may be judged by the Adviser to be of comparable quality) after the Fund purchases them.

**Leverage Risk.** The Fund may obtain financing to meet repurchase requests or to make investments in reinsurance-related securities. Therefore, the Fund is subject to leverage risk. The Fund’s borrowings may be on
a secured or unsecured basis and at fixed or variable rates of interest. Leverage magnifies the Fund’s exposure to declines in the value of one or more underlying reference assets or creates investment risk with respect to a larger pool of assets than the Fund would otherwise have and may be considered a speculative technique. This risk is enhanced for the Fund because it invests substantially all its assets in reinsurance-related securities. Reinsurance-related securities can quickly lose all or much of their value if a triggering event occurs. Thus, to the extent assets subject to a triggering event are leveraged, the losses could substantially outweigh the Fund’s investment and result in significant losses to the Fund. The value of an investment in the Fund will be more volatile and other risks tend to be compounded if and to the extent the Fund borrows or uses derivatives or other investments that have embedded leverage.

The Fund’s ability to obtain leverage through borrowings is dependent upon its ability to establish and maintain an appropriate line of credit. Market conditions may unfavorably impact the Fund’s ability to secure borrowings on terms as favorable as more established borrowers in the market, or to obtain financing on commercially feasible terms. Borrowing will also cost the Fund interest expense and other fees. The cost of borrowing may reduce the Fund’s return. To the extent the Fund is able to secure financing, fluctuations in interest rates could increase the costs associated with the Fund’s use of certain forms of leverage, and such costs could reduce the Fund’s return.

In addition to any more stringent terms imposed by a lender, the 1940 Act requires a closed-end fund to maintain asset coverage of not less than 300% of the value of the outstanding amount of senior securities representing indebtedness (as defined in the 1940 Act) and generally requires a closed-end fund to make provision to prohibit the declaration of any dividend (except a dividend payable in stock of the fund) or distribution on the fund’s stock or the repurchase of any of the fund’s stock, unless, at the time of the declaration or repurchase, there is asset coverage of at least 300% after deducting the amount of the dividend, distribution or purchase price, as the case may be. To satisfy 1940 Act requirements in connection with leverage or to meet obligations, the Fund may be required to dispose of portfolio securities when such disposition might not otherwise be desirable. Engaging in such transactions may cause the Fund to liquidate positions when it may not be advantageous to do so to satisfy its obligations or to meet segregation requirements. There can be no assurance that the Fund’s use of leverage will be successful.

**Effects of Leverage.** Assuming that leverage will represent approximately 0.43% of the Fund’s total assets (including the amounts of such leverage) and that the Fund will bear expenses relating to that leverage at an annual effective interest rate of 2.75% (based on estimated market interest rates for such financings under current market conditions), the annual return that the Fund’s portfolio must experience (net of expenses) in order to cover such costs of the leverage would be 0.01%. These figures are merely estimates based on current market conditions, used for illustration purposes only. Actual expenses associated with leverage used by the Fund may vary frequently and may be significantly higher or lower than the rate used for the example above.

The following table is furnished in response to requirements of the Commission. It is designed to illustrate the effects of leverage on corresponding Share total return, assuming investment portfolio total returns (consisting of income and changes in the value of investments held in the Fund’s portfolio) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table further assumes that the Fund utilizes borrowings representing approximately 0.43% of the Fund’s total assets (including the amounts of leverage obtained through the use of such borrowings) and a projected annual rate of interest on the Fund’s borrowings of 2.75%, as discussed above. Your actual returns may be greater or less than those appearing below.

| Assumed Return on Portfolio (Net of Expenses) | (10.00)% | (5.00)% | 0.00% | 5.00% | 10.00% |
| Corresponding Share Total Return | (10.04)% | (5.02)% | 0.00% | 5.02% | 10.04% |

Corresponding Share total return is composed of two elements—the Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying interest expenses on the Fund’s leveraging transactions as described above and dividend payments on any preferred shares issued by the
Fund) and gains or losses on the value of the securities the Fund owns. This table reflects the hypothetical performance of the Fund’s portfolio and not the performance of the Fund’s Shares, the value of which will be determined by market forces and other factors.

The Fund currently uses leverage as a liquidity source to meet redemption needs and to fund the timing differences related to the purchase of Quota Share Notes and may consider other potential uses in the future. The Fund’s willingness to use leverage, and the extent to which leverage is used at any time, will depend on many factors, including Stone Ridge’s assessment of the yield curve environment, interest rate trends, market conditions, and other factors.

**Derivatives Risk.** Derivatives involve the risk that changes in their value may not move as expected relative to changes in the value of the underlying reference they are designed to track. The Fund may invest in derivatives for investment purposes and for hedging and risk management purposes. Derivatives risk may be more significant when derivatives are used to enhance return or as a substitute for a cash investment option, rather than solely to hedge the risk of a position held by the Fund. See the Statement of Additional Information for additional information of the various types and uses of derivatives in the Fund’s strategies.

The use of derivatives involves risks that are in addition to, and potentially greater than, the risks of investing directly in securities and other more traditional assets. In particular, the Fund’s use of OTC derivatives exposes it to the risk that the counterparties will be unable or unwilling to make timely settlement payments or otherwise honor their obligations. An OTC derivatives contract typically can be closed only with the consent of the other party to the contract. If the counterparty defaults, the Fund will still have contractual remedies but may not be able to enforce them. Because the contract for each OTC derivative is individually negotiated, the counterparty may interpret contractual terms differently than the Fund and, if it does, the Fund may decide not to pursue its claims against the counterparty to avoid incurring the cost and unpredictability of legal proceedings. The Fund, therefore, may be unable to obtain payments the Adviser believes are owed to it under OTC derivatives contracts, or those payments may be delayed or made only after the Fund has incurred the costs of litigation.

The Fund may invest in derivatives that (i) do not require the counterparty to post collateral (e.g., foreign currency forwards), (ii) require collateral but that do not provide for the Fund’s security interest in it to be perfected, (iii) require a significant upfront deposit by the Fund unrelated to the derivative’s intrinsic value or (iv) do not require that collateral be regularly marked-to-market. When a counterparty’s obligations are not fully secured by collateral, the Fund runs the risk of having limited recourse if the counterparty defaults. Even when obligations are required by contract to be collateralized, the Fund often will not receive the collateral the day the collateral is required to be posted.

The Fund may invest in derivatives with a limited number of counterparties, and events affecting the creditworthiness of any of those counterparties may have a pronounced effect on the Fund. During periods of market disruptions or stress, the Fund may have a greater need for cash to provide collateral for large swings in its mark-to-market obligations under the derivatives in which it has invested.

Derivatives also present other risks described herein, including market risk, illiquidity risk, currency risk and credit risk. OTC derivatives are generally highly illiquid. Many derivatives, in particular OTC derivatives, are complex and their valuation often requires modeling and judgment, which increases the risk of mispricing or improper valuation. The pricing models used may not produce valuations that are consistent with the values the Fund realizes when it closes or sells an OTC derivative. Valuation risk is more pronounced when the Fund enters into OTC derivatives with specialized terms because the value of those derivatives in some cases is determined only by reference to similar derivatives with more standardized terms. As a result, incorrect valuations may result in increased cash payments to counterparties, undercollateralization and/or errors in the calculation of the Fund’s NAV.

The Fund’s use of derivatives may not be effective or have the desired results. Moreover, suitable derivatives will not be available in all circumstances. The Adviser may decide not to use derivatives to hedge or otherwise reduce the Fund’s risk exposures, potentially resulting in losses for the Fund.
Because many derivatives have a leverage component (i.e., a notional value in excess of the assets needed to establish and/or maintain the derivative position), adverse changes in the value or level of the underlying investment may result in a loss substantially greater than the amount invested in the derivative itself. See “Leverage Risk” above.

There is little case or other law interpreting the terms of most derivatives or characterizing their tax treatment. The Fund’s use of derivatives may be subject to special tax rules and could generate additional taxable income for shareholders. See “Distributions and Federal Income Tax Matters” below.

**Options Risk.** A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived and well-executed options program may be adversely affected by market behavior or unexpected events. Successful options strategies may require the anticipation of future movements in securities prices or other economic factors of the underlying investments. No assurances can be given that the Adviser’s judgment in this respect will be correct.

The market price of written options will be affected by many factors, including changes in the market price or other economic attributes of the underlying investment; changes in the realized or perceived volatility of the relevant market and underlying investment; and the time remaining before an option’s expiration.

The market price of options, particularly OTC options, may be adversely affected if the market for the options becomes less liquid or smaller. The Fund may close out a written option position by buying the option instead of letting it expire or be exercised. There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position by buying or selling the option. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or clearinghouse may not at all times be adequate to handle current trading volume; or (vi) a regulator or one or more exchanges could, for economic or other reasons, decide to discontinue the trading of options (or a particular class or series of options) at some future date. If trading were discontinued, the secondary market on that exchange (or in that class or series of options) would cease to exist.

**Swaps Risk.** The use of swaps involves investment techniques and risks that are different from those associated with portfolio security transactions. These instruments are typically not traded on exchanges; under recently adopted rules and regulations, however, transactions in some types of swaps (generally not including equity swaps) are required to be centrally cleared (“cleared swaps”). For OTC swaps, there is a risk that the other party will not perform its obligations to the Fund or that the Fund may be unable to enter into offsetting positions to terminate its exposure or liquidate its position when it wishes to do so. Such occurrences could result in losses to the Fund.

The Fund may obtain event-linked exposure by investing directly or indirectly in, among other things, event-linked swaps, which typically are contingent, or formulaically related to defined trigger events, or by pursuing similar event-linked derivative strategies. Trigger events include hurricanes, earthquakes, weather-related phenomena and other criteria determined by independent parties. If a trigger event(s) occurs, the Fund may lose the swap’s notional amount. As derivative instruments, event-linked swaps are subject to risks in addition to the risks of investing in reinsurance-related securities, including risks associated with the counterparty and leverage. See “Risk Considerations — Leverage” above.

**Credit Risk.** The reinsurance-related securities in which the Fund invests directly or indirectly will be subject to credit risk. The principal invested in many reinsurance-related securities is held by the SPV in a collateral account and invested in various permissible assets set forth under the terms of the SPV. In these cases, typically, the collateral account is invested in high quality U.S. government securities (i.e., U.S. Treasury bonds). However, in certain reinsurance-related securities, the collateral account may be invested in high yielding, higher risk
securities. Collateral will generally be invested in accordance with the terms of the SPV and overseen by a collateral manager appointed by the SPV; therefore, the Fund is dependent upon the manager to invest the collateral account proceeds appropriately. A small portion of the reinsurance-related securities in which the Fund invests may, in lieu of such collateral account arrangements, provide for the collateral to be held by the reinsurer. When a collateral account is invested in higher yielding, higher risk securities or when the collateral is held directly by the reinsurer, the Fund will be subject to the risk of non-payment of scheduled principal and interest on such collateral. Such non-payments and defaults may reduce the income to the Fund and negatively impact the value of Fund Shares.

**Foreign Investing Risk.** The Fund may invest directly or indirectly in reinsurance-related securities issued by foreign sovereigns and foreign entities that are corporations, partnerships, trusts or other types of business entities. Because the majority of reinsurance-related security issuers are domiciled outside the United States, the Fund will normally invest significant amounts of its assets in non-U.S. entities. Accordingly, the Fund may invest without limitation in securities issued by non-U.S. entities, including those in emerging market countries. Certain SPVs in which the Fund invests may be sponsored by non-U.S. insurers that are not subject to the same regulation as that to which U.S. insurers are subject. Such SPVs may pose a greater risk of loss, for example, due to less stringent underwriting and/or risk-retention requirements. The Fund’s investments will consist primarily of event-linked bonds, Quota Share Notes, Excess of Loss Notes and ILW Notes that provide the Fund with contractual rights under the terms of the issuance. While the contractual rights of such instruments are similar whether they are issued by a U.S. issuer or a non-U.S. issuer, there may be certain additional risks associated with non-U.S. issuers. For example, foreign issuers could be affected by factors not present in the U.S., including expropriation, confiscatory taxation, lack of uniform accounting and auditing standards, less publicly available financial and other information, potential difficulties in enforcing contractual obligations, and increased costs to enforce applicable contractual obligations outside the U.S. Fluctuations in foreign currency exchange rates and exchange controls may adversely affect the market value of the Fund’s investments in foreign securities. See “Currency Risk” below. Settlements of securities transactions in foreign countries are subject to risk of loss, may be delayed and are generally less frequent than in the U.S., which could affect the liquidity of the Fund’s assets.

**Currency Risk.** It is expected that a substantial portion of the Fund’s direct or indirect investments in reinsurance-related securities will be U.S. dollar denominated investments. To the extent the Fund invests in non-U.S. dollar denominated instruments, a change in the value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency. If the U.S. dollar rises in value against a foreign currency, a security denominated in that currency will be worth less in U.S. dollars and if the U.S. dollar decreases in value against a foreign currency, a security denominated in that currency will be worth more in U.S. dollars. Currency risk also includes the risk that a currency to which the Fund has obtained exposure through hedging declines in value relative to the currency being hedged, in which event the Fund may realize a loss both on the hedging instrument and on the currency being hedged. There can be no assurances or guarantees that any efforts the Fund makes to hedge exposure to foreign exchange rate risks that arise as a result of its investments will successfully hedge against such risks or that adequate hedging arrangements will be available on an economically viable basis, and in some cases, hedging arrangements may result in additional costs being incurred or losses being greater than if hedging had not been used. Currency exchange rates can fluctuate significantly for many reasons. Derivative transactions in foreign currencies (such as futures, forwards, options and swaps) may involve leverage risk in addition to currency risk. Some countries have and may continue to adopt internal economic policies that affect their currency valuations in a manner that may be disadvantageous for U.S. investors or U.S. companies seeking to do business in those countries. For example, a foreign government may unilaterally devalue its currency against other currencies, which typically would have the effect of reducing the U.S. dollar value of investments denominated in that currency. In addition, a country may impose formal or informal currency exchange controls. These controls may restrict or prohibit the Fund’s ability to repatriate both investment capital and income, which could undermine the value and liquidity of the Fund’s portfolio holdings and potentially place the Fund’s assets at risk of total loss. As a result, if the exchange rate for any such currency declines after the Fund’s income has been earned and converted into U.S. dollars but before payment to shareholders, the Fund could be required to liquidate portfolio investments to make such
distributions. Similarly, if the Fund incurs an expense in U.S. dollars and the exchange rate declines before the expense is paid, the Fund would have to convert a greater amount to U.S. dollars to pay for the expense at that time than it would have had to convert at the time the Fund incurred the expense.

Equity Investing Risk. The Fund may at times invest directly or indirectly in equity securities, which may be publicly or privately offered. The equity securities in which the Fund invests may be more volatile than the equity markets as a whole. Equity investing risk is the risk that the value of equity instruments to which the Fund is exposed will fall due to general market or economic conditions; overall market changes; local, regional or global political, social or economic instability; currency, interest rate and commodity price fluctuations; perceptions regarding the industries in which the issuers participate, and the particular circumstances and performance of the issuers. Market conditions may affect certain types of equity securities to a greater extent than other types. Although equities have historically generated higher average returns than debt securities over the long term, equity securities also have experienced significantly more volatility in returns. Equities to which the Fund will be exposed are structurally subordinated to bonds and other debt instruments in a company’s capital structure, in terms of priority to corporate income, and, therefore, will be subject to greater dividend risk than debt instruments of such issuers. Finally, the prices of equities may be sensitive to rising interest rates, as the costs of capital rise and borrowing costs increase.

Preferred Securities Risk. Preferred securities may pay fixed or adjustable rates of return. Preferred securities are subject to issuer-specific and market risks applicable generally to equity securities. In addition, preferred securities generally pay a dividend and rank ahead of common stocks and behind debt securities in claims for dividends and for assets of the issuer in a liquidation or bankruptcy. For this reason, the value of preferred securities will usually react more strongly than bonds and other debt to actual or perceived changes in the company’s financial condition or prospects. Preferred securities may also be sensitive to changes in interest rates. When interest rates rise, the fixed dividend on preferred securities may be less attractive, causing the price of preferred stocks to decline. Preferred securities of smaller companies may be more vulnerable to adverse developments than preferred stock of larger companies.

Subsidiary Risk. By investing through a Subsidiary, the Fund is exposed to the risks associated with a Subsidiary’s investments. Subsidiaries are not registered as investment companies under the 1940 Act and are not subject to all of the investor protections of the 1940 Act, although each Subsidiary is managed pursuant to the compliance policies and procedures of the Fund applicable to it. Changes in the laws of the United States and/or the jurisdiction in which a Subsidiary is organized could result in the inability of the Fund and/or a Subsidiary to operate as described in this prospectus and could adversely affect the Fund.

Non-Diversification Risk. The Fund is classified as a “non-diversified” fund under the 1940 Act. Accordingly, the Fund may invest a greater portion of its assets in the securities of a single issuer than if it were a “diversified” fund. To the extent that the Fund invests a higher percentage of its assets in the securities of a single issuer, the Fund is subject to a higher degree of risk associated with and developments affecting that issuer than a fund that invests more widely.

Market Risk. The value of the Fund’s investments may decline, sometimes rapidly or unpredictably, due to general economic conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic or political conditions throughout the world, changes in interest or currency rates or adverse investor sentiment generally. The value of the Fund’s investments also may decline because of factors that affect a particular industry or industries. For example, the financial crisis that began in 2008 caused a significant decline in the value and liquidity of many securities.

Management and Operational Risk; Cyber-Security Risk. The Fund is subject to management risk because it relies on the Adviser’s ability to achieve its investment objective. The Fund runs the risk that the Adviser’s investment techniques will fail to produce desired results and cause the Fund to incur significant losses. The Adviser may select investments that do not perform as anticipated by the Adviser, may choose to hedge or not to hedge positions at disadvantageous times and may fail to use derivatives effectively.
Any imperfections, errors, or limitations in quantitative analyses and models used by the Adviser as part of its investment process could affect the Fund’s performance. Models that appear to explain prior market data can fail to predict future market events. Further, the data used in models may be inaccurate or may not include the most recent information about a company or a security.

The Fund also is subject to the risk of loss as a result of other services provided by the Adviser and other service providers, including pricing, administrative, accounting, tax, legal, custody, transfer agency and other services. Operational risk includes the possibility of loss caused by inadequate procedures and controls, human error and cyber attacks, disruptions, and failures affecting, or by, a service provider. For example, trading delays or errors (both human and systematic) could prevent the Fund from benefiting from potential investment gains or avoiding losses.

The Fund and its service providers’ use of internet, technology and information systems may expose the Fund to potential risks linked to cyber-security breaches of those technological or information systems. Cyber-security breaches could allow unauthorized parties to gain access to proprietary information, customer data or Fund assets, or cause the Fund or its service providers to suffer data corruption or lose operational functionality. With the increased use of technologies and the dependence on computer systems to perform necessary business functions, investment companies (such as the Fund) and their service providers (including the Adviser) may be prone to operational and information security risks resulting from cyber attacks and/or other technological malfunctions. In general, cyber attacks are deliberate, but unintentional events may have similar effects. Cyber attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorization, and causing operational disruption. Successful cyber attacks against, or security breakdowns of, the Fund, the Adviser, or the custodian, transfer agent, or other third-party service provider may adversely affect the Fund or its shareholders. For instance, cyber attacks may interfere with the processing of shareholder transactions, affect the Fund’s ability to calculate its NAV, cause the release of private shareholder information or confidential Fund information, impede trading, cause reputational damage, result in theft of Fund assets, and subject the Fund to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. While the Adviser has established business continuity plans and systems designed to prevent cyber attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified.

**Tax Risk.** The Fund intends to qualify for treatment as a RIC under Subchapter M of Chapter 1 of the Code. In order to qualify for such treatment, the Fund must derive at least 90% of its gross income each taxable year from qualifying income, meet certain asset diversification tests at the end of each fiscal quarter, and distribute at least 90% of its investment company taxable income. The Fund’s investment strategy will potentially be limited by its intention to qualify for treatment as a RIC. The tax treatment of certain of the Fund’s investments under one or more of the qualification or distribution tests applicable to RICs is not certain. An adverse determination or future guidance by the IRS might affect the Fund’s ability to qualify for such treatment.

If, in any year, the Fund were to fail to qualify for treatment as a RIC under the Code for any reason, and were not able to cure such failure, the Fund would be subject to tax on its taxable income at corporate rates, and all distributions from earnings and profits, including any distributions of net tax-exempt income and net long-term capital gains, would be taxable to shareholders as ordinary income.

**Prepayment or Call Risk.** Many fixed income securities give the issuer the option to prepay or call the security prior to its maturity date. Issuers often exercise this right when interest rates fall. Accordingly, if the Fund holds a fixed income security that can be prepaid or called prior to its maturity date, it may not benefit fully from the increase in value that other fixed income securities generally experience when interest rates fall. Upon prepayment of the security, the Fund also would be forced to reinvest the proceeds at then current yields, which would be lower than the yield of the security that was prepaid or called. In addition, if the Fund purchases a fixed income security at a premium (at a price that exceeds its stated par or principal value), the Fund may lose the amount of the premium paid in the event of prepayment.
**Extension Risk.** During periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected principal payments. This may lock in a below market interest rate, increase the security’s duration (the estimated period until the security is paid in full) and reduce the value of the security.

**QIB Qualification Risk.** The event-linked bonds and Quota Share Notes in which the Fund invests are only available to qualified institutional buyers (“QIBs”), as defined in Rule 144A under the 1933 Act. At any given time, the Fund may not have sufficient assets to be deemed a QIB for purposes of Rule 144A, whether because investment losses or repurchases cause the Fund’s assets to drop below the threshold amount or for other reasons. In the event the Fund does not qualify as a QIB, it will not be able to purchase additional event-linked bonds or Quota Share Notes, which may prevent the Fund from achieving its investment objective.

**Subordinated Securities Risk.** Certain SPVs in which the Fund invests may issue multiple tranches of interests to investors. A holder of securities that are subordinated or “junior” to more senior securities of an issuer is entitled to payment after holders of more senior securities of the issuer. Subordinated securities are more likely to suffer a credit loss than non-subordinated securities of the same issuer, any loss incurred by the subordinated securities is likely to be proportionately greater, and any recovery of interest or principal may take more time. As a result, even a perceived decline in creditworthiness of the issuer is likely to have a greater impact on them.

**Government Securities Risk.** The Fund may invest directly or indirectly in securities issued or guaranteed by the U.S. government (including U.S. Treasury obligations which differ in their interest rates, maturities and times of issuance) or its agencies and instrumentalities (such as the Government National Mortgage Association (Ginnie Mae), the Federal National Mortgage Association (Fannie Mae), or the Federal Home Loan Mortgage Corporation (Freddie Mac)). U.S. government securities are subject to market risk, risks related to changes in interest rates, and credit risk. Securities, such as those issued or guaranteed by Ginnie Mae or the U.S. Treasury, that are backed by the full faith and credit of the United States are guaranteed only as to the timely payment of interest and principal when held to maturity and the market prices for such securities will fluctuate. Notwithstanding that these securities are backed by the full faith and credit of the United States, circumstances could arise that would prevent the payment of interest or principal. This would result in losses to the Fund. Securities issued or guaranteed by U.S. government related organizations, such as Fannie Mae and Freddie Mac, are not backed by the full faith and credit of the U.S. government and no assurance can be given that the U.S. government would provide financial support. Therefore, U.S. government-related organizations may not have the funds to meet their payment obligations in the future. As a result of their high credit quality and market liquidity, U.S. Government securities generally provide a lower current return than obligations of other issuers.

The U.S. Treasury Department placed Fannie Mae and Freddie Mac into conservatorship in September 2008. Fannie Mae and Freddie Mac are continuing to operate as going concerns while in conservatorship and each remains liable for all of its obligations, including its guaranty obligations, associated with its mortgage-backed securities. Although the U.S. government has provided financial support to Fannie Mae and Freddie Mac, there can be no assurance that it will continue to support these or other government-sponsored entities in the future. Further, the benefits of any such government support may extend only to the holders of certain classes of an issuer’s securities.

**Focused Investment Risk.** Issuers of event-linked bonds and other reinsurance-related securities are generally classified as belonging to the financial services sector; however, the Fund has no current intention to invest in banks or other issuers that may be commonly considered in the financial services sector. As a result of this categorization of reinsurance-related securities, the Fund may be subject to the risks of such focused investing. The industries within the financial services sector are subject to extensive government regulation, which can limit both the amounts and types of loans and other financial commitments they can make, and the interest rates and fees they can charge. Profitability can be largely dependent on the availability and cost of capital funds and the rate of corporate and consumer debt defaults, and can fluctuate significantly when interest rates change. Credit losses resulting from financial difficulties of borrowers can negatively affect the financial services industries. Insurance companies can be subject to severe price competition. The financial services industries are currently
undergoing relatively rapid change as existing distinctions between financial service segments become less clear. For example, recent business combinations have included insurance, finance, and securities brokerage under single ownership. Non-U.S. financial services companies, including insurance companies, may be subject to different levels of regulation than that to which similar companies operating in the U.S. are subject. Similarly, to the extent the Fund has exposure to a significant extent in investments tied economically to a specific geographic region, country or a particular market, it will have more exposure to regional and country economic risks than it would if it had more geographically diverse investments.

Cash Management Risk. The value of the investments held by the Fund for cash management or temporary defensive purposes may be affected by changing interest rates and by changes in credit ratings of the investments. To the extent that the Fund has any uninvested cash, the Fund will be subject to risk with respect to the depository institution holding the cash. To the extent the Fund makes temporary or defensive investments in cash or cash equivalents, it might not achieve its investment objective.

Securities Lending Risk. As with other extensions of credit, there are risks of delay and costs involved in recovery of securities or even loss of rights in the securities loaned or in the collateral if the borrower of the securities fails to return the securities or fails financially. These delays and costs could be greater with respect to foreign securities. The Fund may pay lending fees to the party arranging the loan. Securities lending collateral may be invested in liquid, short-term investments, such as money market funds, managed by third party advisers or banks. The Fund bears the risk of investments made with the cash collateral received by the Fund in securities lending transactions. Investments of cash collateral may depreciate and/or become illiquid, although the Fund remains obligated to return the collateral amount to the borrower upon termination or maturity of the securities loan and may realize losses on the collateral investments and/or be required to liquidate other portfolio assets in order to satisfy its obligations.

Investing in Other Investment Companies Risk. Investing in other investment companies subjects the Fund to the risks of investing in the underlying securities or assets held by those investment companies. When investing in another investment company, the Fund will bear a pro rata portion of the underlying fund’s expenses, in addition to its own expenses.

Repurchase Offers Risk. As described under “Periodic Repurchase Offers” below, the Fund is an “interval fund.” In order to provide liquidity to shareholders, the Fund, subject to applicable law, conducts quarterly repurchase offers of the Fund’s outstanding Shares at NAV, subject to approval of the Board. In all cases such repurchases will be for at least 5% and not more than 25%, and are currently expected to be for 5%, of its outstanding Shares at NAV, pursuant to Rule 23c-3 under the 1940 Act. The Fund believes that these repurchase offers are generally beneficial to the Fund’s shareholders, and repurchases generally will be funded from available cash or sales of portfolio securities. However, repurchase offers and the need to fund repurchase obligations may affect the ability of the Fund to be fully invested or may force the Fund to maintain a higher percentage of its assets in liquid investments, which may harm the Fund’s investment performance. Moreover, diminution in the size of the Fund through repurchases may result in untimely sales of portfolio securities (with associated imputed transaction costs, which may be significant), and may limit the ability of the Fund to participate in new investment opportunities or to achieve its investment objective. If the Fund employed investment leverage, repurchases of Shares would compound the adverse effects of leverage in a declining market. In addition, if the Fund borrows to finance repurchases, interest on that borrowing will negatively affect shareholders who do not tender their Shares by increasing the Fund’s expenses and reducing any net investment income. If a repurchase offer is oversubscribed the Fund will repurchase the Shares tendered on a pro rata basis, and shareholders will have to wait until the next repurchase offer to make another repurchase request. As a result, shareholders may be unable to liquidate all or a given percentage of their investment in the Fund during a particular repurchase offer. Some shareholders, in anticipation of proration, may tender more Shares than they wish to have repurchased in a particular quarter, thereby increasing the likelihood that proration will occur. A shareholder may be subject to market and other risks, and the NAV of Shares tendered in a repurchase offer may decline between the Repurchase Request Deadline and the date on which the NAV for tendered Shares is determined. In addition, the repurchase of Shares by the Fund may be a taxable event to shareholders.
Expense Risk. Your actual costs of investing in the Fund may be higher than the expenses shown in “Annual Fund Operating Expenses” for a variety of reasons. For example, expense ratios may be higher than those shown if overall net assets decrease.

The Fund may invest in exchange-traded funds or other pooled investment vehicles. As an investor in a pooled investment vehicle, the Fund would be subject to its ratable share of that pooled investment vehicle’s expenses, including its advisory and administration expenses.

Reporting Requirements. Shareholders who beneficially own Shares that constitute more than 5% of the Fund’s Shares may be subject to certain requirements under the Securities Exchange Act of 1934, as amended, and the rules promulgated thereunder. These may include requirements to file certain reports with the Commission. The Fund has no obligation to file such reports on behalf of such shareholders or to notify shareholders that such reports are required to be made. Shareholders who may be subject to such requirements should consult with their legal advisors.

Anti-Takeover Provisions. The Fund’s Amended and Restated Agreement and Declaration of Trust, together with any amendments thereto, includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status.

MANAGEMENT OF THE FUND

Board of Trustees

The Board oversees the conduct of the Fund’s affairs and the Adviser’s management of the Fund.

The Adviser

Stone Ridge Asset Management LLC acts as the Fund’s investment manager under an Investment Management Agreement (the “Management Agreement”). Stone Ridge’s principal office is located at 510 Madison Avenue, 21st Floor, New York, New York 10022. As of December 31, 2016, Stone Ridge managed approximately $8.8 billion of assets. Stone Ridge is a Delaware limited liability company.

Under the general oversight of the Board, Stone Ridge has been engaged to carry out the investment and reinvestment of the assets of the Fund, furnish continuously an investment program with respect to the Fund, determine what investments should be purchased, sold or exchanged and implement such determinations by causing the Fund to make investments directly or through a Subsidiary. Stone Ridge will compensate all Trustees and officers of the Fund who are members of Stone Ridge’s organization and who render investment services to the Fund.

The Fund has agreed to pay Stone Ridge as compensation under the Management Agreement a fee in the amount of 2.00% of the average daily net assets of the Fund. Stone Ridge may voluntarily reimburse additional fees and expenses but is under no obligation to do so. Any such voluntary reimbursements may be terminated at any time. A discussion regarding the considerations of the Fund’s Board for approving the Fund’s investment management agreement was included in the Fund’s Annual Report for the period ended October 31, 2016.

Pursuant to the Management Agreement, Stone Ridge agrees to manage the investment and reinvestment of the Fund’s assets, determine what investments will be purchased, held, sold or exchanged by the Fund and what portion, if any, of the assets of the Fund will be held uninvested, and continuously review, supervise and administer the investment program of the Fund. Stone Ridge bears its own operating and overhead expenses attributable to its duties under the Management Agreement (such as salaries, bonuses, rent, office and administrative expenses, depreciation and amortization, and auditing expenses), except that the Fund bears travel expenses (or an appropriate portion thereof) of Trustees or Fund officers who are partners, directors, trustees, or employees of Stone Ridge to the extent that such expenses relate to attendance at meetings of the Board or any
committees thereof or Stone Ridge thereto, and the Fund bears all or a portion of the expenses related to the Fund’s chief compliance officer, as may be approved by the Board from time to time.

The Fund bears all other costs of its operations, including, without limitation, the compensation of the Independent Trustees; ordinary administrative and operating expenses, including the management fee and all expenses associated with the pricing of Fund assets; risk management expenses; ordinary and recurring investment expenses, including all fees and expenses directly related to portfolio transactions and positions for the Fund’s account (including brokerage, clearing and settlement costs), custodial costs and interest charges; professional fees (including, without limitation, expenses of consultants, experts, and specialists); fees and expenses in connection with repurchase offers and any repurchases or redemptions of Fund shares; legal expenses (including legal and other out-of-pocket expenses incurred in connection with the organization of the Fund and the offering of its shares); accounting and auditing expenses incurred in preparing, printing and delivering all reports (including such expenses incurred in connection with any Fund document) and tax information for shareholders and regulatory authorities, and all filing costs, fees, travel expenses and any other expenses directly related to the investment of the Fund’s assets. The Fund will pay any extraordinary expenses it may incur, including any litigation expenses.

**Portfolio Managers**

Robert Gutmann, Alexander Nyren, Benjamin Robbins, Ross Stevens and Yan Zhao are the Portfolio Managers of the Fund. Each of the Portfolio Managers other than Mr. Robbins has been a Portfolio Manager since the Fund’s inception in 2013. Mr. Robbins has been a Portfolio Manager since May 2015. Each of the Portfolio Managers also is a Portfolio Manager of other registered investment companies, including mutual funds.

**Robert Gutmann.** Robert Gutmann, Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund and its investments jointly with Mr. Nyren, Mr. Robbins, Mr. Stevens and Ms. Zhao. Mr. Gutmann is a co-founder of Stone Ridge. Prior to joining Stone Ridge in 2012, Mr. Gutmann was the head of Delta-One Synthetic Solutions Group at RBC Capital Markets from 2010 to 2012. He started his career at Morgan Stanley, where he became a senior trader in the Delta-One Structured Products group. Mr. Gutmann received his B.A. in Mathematics and Music from Columbia University.

**Alexander Nyren.** Alexander Nyren, Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund and its investments jointly with Mr. Gutmann, Mr. Robbins, Mr. Stevens and Ms. Zhao. Prior to joining Stone Ridge in 2013, Mr. Nyren was in the insurance practice of Oliver Wyman since 2010, where he was a Principal. Previously, he was at Barclays Capital/Lehman Brothers from 2006 to 2010, where he was a Vice President. In that role, he structured insurance-linked securities, including approximately $1.4 billion of catastrophe bonds. Mr. Nyren received an MPhil in Economics from the University of Cambridge and a BA with highest honors in Applied Mathematics from Harvard University.

**Benjamin Robbins.** Benjamin Robbins, Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund and its investments jointly with Mr. Gutmann, Mr. Nyren, Mr. Stevens and Ms. Zhao. Prior to joining Stone Ridge in 2014, Mr. Robbins was a Director at Deutsche Bank, where he worked from 2006 to 2014 and managed a trading book of insurance-linked securities. Mr. Robbins holds an AB, magna cum laude, in Physics from Harvard University and is a CFA charterholder.

**Ross Stevens.** Ross Stevens, Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund and its investments jointly with Mr. Gutmann, Mr. Nyren, Mr. Robbins and Ms. Zhao. Mr. Stevens is the Founder of Stone Ridge. Prior to founding Stone Ridge in 2012, Mr. Stevens was a member of the Investment Committee and Co-Head of the Portfolio Managers Committee at Magnetar Capital from 2008 through 2012. Previously, he was Global Co-Head of Equities at Jefferies and Global Head of Electronic Trading at Bank of America. Mr. Stevens started his career in quantitative research at Goldman Sachs Asset Management after receiving his PhD in Finance and Statistics from University of Chicago (Booth) and his BSE in Finance from University of Pennsylvania (Wharton).
Yan Zhao. Yan Zhao, Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund and its investments jointly with Mr. Gutmann, Mr. Nyren, Mr. Robbins and Mr. Stevens. Prior to joining Stone Ridge in 2012, Ms. Zhao was a senior management consultant at the Boston Consulting Group from 2011 to 2012. Ms. Zhao started her career at Morgan Stanley, where she traded delta-one structured products with Mr. Gutmann. Ms. Zhao holds an MBA from Harvard Business School and a BA with honors in Economics from Harvard University.

Additional Information Regarding the Adviser and Portfolio Managers

The Statement of Additional Information provides additional information about the Adviser, including information about potential conflicts of interest that the Adviser may face in managing the Fund, and about each Portfolio Manager’s compensation, other accounts managed by each Portfolio Manager, and each Portfolio Manager’s ownership of securities in the Fund. The Statement of Additional Information is part of this prospectus and is available free of charge by calling (855) 609-3680 or at www.stoneridgefunds.com. The information (other than this prospectus, including the Statement of Additional Information) contained on, or that can be accessed through, www.stoneridgefunds.com is not part of this prospectus or the Statement of Additional Information.

Control Persons

A control person is a person who beneficially owns more than 25% of the voting securities of a company. As of January 31, 2017, the Fund did not know of any person or entity who “controlled” the Fund.

The Fund’s Service Providers

Custodian. U.S. Bank, NA, located at 1555 N. RiverCenter Drive, Suite 302, Milwaukee, Wisconsin 53212, is the Fund’s custodian.

Transfer Agent. U.S. Bancorp Fund Services, LLC, located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the Fund’s transfer agent and dividend disbursing agent.

Administrator. U.S. Bancorp Fund Services, LLC (the “Administrator”), located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the Fund’s administrator and accounting agent, performing general administrative tasks for the Fund, including, but not limited to, keeping financial books and records of the Fund. The Fund compensates the Administrator at rates that are determined based on the aggregate net assets of the funds in the Stone Ridge fund complex, with each fund paying a pro rata portion of the fee allocated on the basis of the funds’ net assets.

Independent Registered Public Accounting Firm. Ernst & Young LLP, 5 Times Square, New York, New York 10036, serves as the Fund’s Independent Registered Public Accounting Firm, and is registered with, and subject to regular inspection by, the Public Company Accounting Oversight Board.

Legal Counsel. Ropes & Gray LLP, located at 800 Boylston Street, Boston, Massachusetts, acts as legal counsel to the Fund.

Distributions

The Fund intends to declare and pay dividends of substantially all net investment income and net realized capital gains at least annually, although the Fund may declare and pay dividends more frequently (e.g., quarterly). Unless shareholders specify otherwise, dividends will be reinvested in Shares of the Fund. The Fund may pay distributions from sources that may not be available in the future and that are unrelated to the Fund’s performance, such as from offering proceeds, borrowings and amounts from the Fund’s affiliates that are subject to repayment by investors.
SHAREHOLDER GUIDE

PLAN OF DISTRIBUTION

Quasar Distributors, LLC, located at 615 East Michigan Street, Milwaukee, Wisconsin 53202 (the “Distributor”), is the principal underwriter of Shares of the Fund. Shares may be purchased only through the Distributor. The Distributor acts as the distributor of Shares for the Fund on a best efforts basis, subject to various conditions, pursuant to the terms of its contract with the Fund. The Distributor is not obligated to sell any specific amount of Shares of the Fund. The Distributor will also act as agent for the Fund in connection with repurchases of Shares.

Shares of the Fund will be continuously offered through the Distributor, as the exclusive distributor. The Fund has authorized one or more intermediaries (e.g., brokers, investment advisers, etc. collectively “Intermediaries”) to receive orders on its behalf. Such Intermediaries are authorized to designate other Intermediaries to receive orders on the Fund’s behalf. The Fund will be deemed to have received an order when an authorized broker or, if applicable, a broker’s authorized designee, receives the order. The Shares will be offered at NAV per share calculated each regular business day.

The Fund and the Distributor will have the sole right to accept orders to purchase Shares and reserve the right to reject any order in whole or in part.

Investors may be charged a fee if they effect transactions through an Intermediary.

No market currently exists for the Fund’s Shares. The Fund’s Shares are not listed, and the Fund does not currently intend to list its Shares for trading on any securities exchange and does not anticipate that a secondary market will develop for its Shares. Neither the Adviser nor the Distributor intends to make a market in the Fund’s Shares.

The Distributor is not obligated to buy any of the Shares and does not intend to make a market in the Shares. The Fund has agreed to indemnify the Distributor and certain of the Distributor’s affiliates against certain liabilities, including certain liabilities arising under the 1933 Act. To the extent consistent with applicable law, the Distributor has agreed to indemnify the Fund and each Trustee against certain liabilities under the 1933 Act and in connection with the services rendered to the Fund.

HOW TO BUY SHARES

Shareholders who invest in the Fund through an Intermediary should contact their financial Intermediary regarding purchase procedures. Shares generally are available for investment only by clients of registered investment advisers and a limited number of certain other Eligible Investors. All investments are subject to approval of the Adviser, and all investors must complete and submit the necessary account registration forms in good order. The Fund reserves the right to reject any initial or additional investment and to suspend the offering of Shares. Purchase through an Intermediary does not affect these eligibility requirements.

A purchase of Shares will be made at the NAV per share next determined following receipt of a purchase order in good order by the Fund, its authorized agent, its Distributor’s authorized agent, or authorized Intermediary or the Intermediary’s authorized designee if received at a time when the Fund is open to new investments. A purchase order is in “good order” when the Fund, its Distributor’s agent, an authorized Intermediary or, if applicable, an Intermediary’s authorized designee, receives all required information, including properly completed and signed documents, and the purchase order is approved by the Adviser. Once the Fund (or one of its authorized agents) accepts a purchase order, you may not cancel or revoke it. The Fund reserves the right to cancel any purchase order it receives if the Fund believes that it is in the best interest of the Fund’s shareholders to do so.

Clients of investment advisory organizations may also be subject to investment advisory fees under their own arrangements with such organizations.
Shares are offered to the following groups of investors (“Eligible Investors”):

1. Institutional investors, including registered investment advisers (RIAs);
2. Clients of institutional investors;
3. Tax-exempt retirement plans of the Adviser and its affiliates and rollover accounts from those plans;
4. Certain other Eligible Investors as approved from time to time by the Adviser. Eligible Investors include employees, former employees, shareholders, members and directors and affiliates of the Adviser and the Fund or each of their affiliates, and friends and family members of such persons; and
5. Investment professionals or other financial intermediaries investing for their own accounts and their immediate family members.

Some Intermediaries may impose different or additional eligibility requirements. The Adviser has the discretion to further modify or waive their eligibility requirements.

Shares of the Fund generally may be sold only to U.S. citizens, U.S. residents, and U.S. domestic corporations, partnerships, trusts or estates. The Fund reserves the right to refuse any request to purchase Shares. The Shares are subject to the investment minimums described below.

**Investment Minimums**

The minimum initial account size is $15 million. This minimum investment requirement may be modified or reduced. For eligibility groups 3, 4 and 5 described above under “How to Buy Fund Shares,” there is no minimum investment requirement.

**Other Policies**

*No Share Certificates.* The issuance of Shares is recorded electronically on the books of the Fund. You will receive a confirmation of, or account statement reflecting, each new transaction in your account, which will also show the total number of Shares of the Fund you own. You can rely on these statements in lieu of certificates. The Fund does not issue certificates representing Shares of the Fund.

**Customer Identification Program**

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify and record information that identifies each person that opens a new account, and to determine whether such person’s name appears on government lists of known or suspected terrorists and terrorist organizations. As a result, the Fund must obtain the following information for each person that opens a new account:

1. Name;
2. Date of birth (for individuals);
3. Residential or business street address (although post office boxes are still permitted for mailing); and
4. Social Security number, taxpayer identification number, or other identifying number.

You may also be asked for a copy of your driver’s license, passport or other identifying document in order to verify your identity. In addition, it may be necessary to verify your identity by cross-referencing your identification information with a consumer report or other electronic database. Additional information may be required to open accounts for corporations and other entities.

Federal law prohibits the Fund and other financial institutions from opening a new account on behalf of a natural person unless they receive the minimum identifying information listed above. After an account is opened, the
Fund may restrict your ability to purchase additional Shares until your identity is verified. The Fund may close your account or take other appropriate action if it is unable to verify your identity within a reasonable time. The Fund and its agents will not be responsible for any loss in an investor’s account resulting from the investor’s delay in providing all required identifying information or from closing an account and redeeming an investor’s Shares when an investor’s identity is not verified.

In addition, the Fund may be required to “freeze” your account if there appears to be suspicious activity or if account information matches information on a government list of known terrorists or other suspicious persons.

eDelivery

eDelivery allows you to receive your quarterly account statements, transaction confirmations and other important information concerning your investment in the Fund online. Select this option on your account application to receive email notifications when quarterly statements and confirmations are available for you to view via secure online access. You will also receive emails whenever a new prospectus, semi-annual or annual fund report is available. To establish eDelivery, call (855) 609-3680.

Fund Closings

The Fund may close at any time to new investments and, during such closings, only the reinvestment of dividends by existing shareholders will be permitted. The Fund may re-open to new investment and subsequently close again to new investment at any time at the discretion of the Adviser. In addition, the Fund expects to close to new investors and investments by existing investors for a period of time in the event that the Stone Ridge Post-Event Reinsurance Fund, another closed-end interval fund managed by the Adviser, commences investment operations. During the time the Fund is closed to new investments, Fund shareholders will continue to be able to participate in periodic repurchase offers, as described below.

In addition, the Fund is made available for investment on a priority basis to a group of investors (the “Consortium”) who have participated in educational sessions regarding the Fund and the asset class in which it invests. If capacity allows, once orders are fulfilled for the Consortium, the Fund is then made available for investment by other investors. The Fund may also prioritize and allocate capacity to the Consortium upon any subsequent re-opening of the Fund. The Consortium members do not have any special rights to offering price, dividends or liquidation. The Consortium consists of a selected group of registered investment advisers who have discretionary authority to invest on their clients’ behalf and a fiduciary duty to their clients, and with whom the Adviser has a previous relationship. Members of the Consortium and their clients are not obligated to invest in the Fund.

PERIODIC REPURCHASE OFFERS

The Fund is a closed-end interval fund and, to provide liquidity and the ability to receive NAV on a disposition of at least a portion of your Shares, makes periodic offers to repurchase Shares. Except as permitted by the Fund’s interval structure, no shareholder will have the right to require the Fund to repurchase its Shares. No public market for Shares exists, and none is expected to develop in the future. Consequently, shareholders generally will not be able to liquidate their investment other than as a result of repurchases of their Shares by the Fund.

The Fund has adopted, pursuant to Rule 23c-3 under the 1940 Act, a fundamental policy, which cannot be changed without shareholder approval, requiring the Fund to offer to repurchase at least 5% and up to 25% of its Shares at NAV on a regular schedule. Although the policy permits repurchases of between 5% and 25% of the Fund’s outstanding Shares, for each quarterly repurchase offer, the Fund currently expects to offer to repurchase 5% of the Fund’s outstanding Shares at NAV subject to approval of the Board. The schedule requires the Fund to make repurchase offers every three months.
Repurchase Dates

The Fund makes quarterly repurchase offers in the months of January, April, July and October. As discussed below, the date on which the repurchase price for Shares is determined will be generally on or about the 15th day of the following month, but shall occur no later than the 14th day after the Repurchase Request Deadline (or the next business day, if the 14th day is not a business day).

Repurchase Request Deadline

The date by which shareholders wishing to tender Shares for repurchase must respond to the repurchase offer, typically falls approximately seven days before the Repurchase Pricing Date (defined below).

When a repurchase offer commences, the Fund sends, at least 21 days before the Repurchase Request Deadline, written notice to each shareholder setting forth, among other things:

- The percentage of outstanding Shares that the Fund is offering to repurchase and how the Fund will purchase Shares on a pro rata basis if the offer is oversubscribed.
- The date on which a shareholder’s repurchase request is due (the repurchase deadline).
- The date that will be used to determine the Fund’s NAV applicable to the repurchase offer (the “Repurchase Pricing Date”). See “Repurchase Dates” above.
- The date by which the Fund will pay to shareholders the proceeds from their Shares accepted for repurchase.
- The NAV of the Shares as of a date no more than seven days before the date of the written notice and the means by which shareholders may ascertain the NAV.
- The procedures by which shareholders may tender their Shares and the right of shareholders to withdraw or modify their tenders before the Repurchase Request Deadline.
- The circumstances in which the Fund may suspend or postpone the repurchase offer.

This notice may be included in a shareholder report or other Fund document. The Repurchase Request Deadline will be strictly observed. If a shareholder fails to submit a repurchase request in good order by the Repurchase Request Deadline, the shareholder will be unable to liquidate Shares until a subsequent repurchase offer, and will have to resubmit a request in the next repurchase offer. Shareholders may withdraw or change a repurchase request with a proper instruction submitted in good form at any point before the Repurchase Request Deadline.

Determination of Repurchase Price and Payment for Shares

The date on which the repurchase price for Shares is determined will be generally on or about the 15th day of the month that follows the repurchase offer (the “repurchase pricing date”), but shall occur no later than the 14th day after the Repurchase Request Deadline (or the next business day, if the 14th day is not a business day). The Fund expects to distribute payment to shareholders between one and three business days after the repurchase pricing date and will distribute such payment no later than seven (7) calendar days after such date. The Fund’s NAV per share may change materially between the date a repurchase offer is mailed and the Repurchase Request Deadline, and it may also change materially between the Repurchase Request Deadline and repurchase pricing date. The method by which the Fund calculates NAV is discussed below under “Determination of Net Asset Value.” During the period an offer to repurchase is open, shareholders may obtain the current NAV by calling the Fund’s transfer agent at (855) 609-3680.

The Fund does not currently charge a repurchase fee. However, the Fund may charge a repurchase fee of up to 2%, which the Fund would retain to help offset non-de minimis estimated costs related to the repurchase (such as
bid to ask spreads) incurred by the Fund, directly or indirectly, as a result of repurchasing Shares, thus allocating estimated transaction costs to the shareholder whose Shares are being repurchased. The Fund may introduce, or modify the amount of, a repurchase fee at any time. The Fund may also waive or reduce the repurchase fee if the Adviser determines that the repurchase is offset by a corresponding purchase or if for other reasons the Fund will not incur transaction costs or will incur reduced transaction costs.

**Suspension or Postponement of Repurchase Offers**

The Fund may suspend or postpone a repurchase offer in limited circumstances set forth in Rule 23c-3 under the 1940 Act, as described below, but only with the approval of a majority of the Trustees, including a majority of Trustees who are not “interested persons” of the Fund, as defined in the 1940 Act.

The Fund may suspend or postpone a repurchase offer only: (1) if making or effecting the repurchase offer would cause the Fund to lose its status as a regulated investment company under Subchapter M of Chapter 1 of the Code; (2) for any period during which the New York Stock Exchange (“NYSE”) or any other market in which the securities owned by the Fund are principally traded is closed, other than customary weekend and holiday closings, or during which trading in such market is restricted; (3) for any period during which an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable, or during which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (4) for such other periods as the Commission may by order permit for the protection of shareholders of the Fund.

**Oversubscribed Repurchase Offers**

There is no minimum number of Shares that must be tendered before the Fund will honor repurchase requests. However, the Fund’s Trustees set for each repurchase offer a maximum percentage of Shares that may be repurchased by the Fund. In the event a repurchase offer by the Fund is oversubscribed, the Fund may repurchase, but is not required to repurchase, additional Shares up to a maximum amount of 2% of the outstanding Shares of the Fund. If the Fund determines not to repurchase additional Shares beyond the repurchase offer amount, or if shareholders tender an amount of Shares greater than that which the Fund is entitled to repurchase, the Fund will repurchase the Shares tendered on a pro rata basis. The Fund does not currently expect to offer to repurchase additional Shares in the event a repurchase offer is oversubscribed.

If any Shares that you wish to tender to the Fund are not repurchased because of proration, you will have to wait until the next repurchase offer and resubmit a new repurchase request, and your repurchase request will not be given any priority over other shareholders’ requests. Thus, there is a risk that the Fund may not purchase all of the Shares you wish to have repurchased in a given repurchase offer or in any subsequent repurchase offer. In anticipation of the possibility of proration, some shareholders may tender more Shares than they wish to have repurchased in a particular quarter, increasing the likelihood of proration.

**There is no assurance that you will be able to tender your Shares when or in the amount that you desire.**

**Consequences of Repurchase Offers**

From the time the Fund distributes or publishes each repurchase offer notification until the repurchase pricing date for that offer, the Fund must maintain liquid assets at least equal to the percentage of its Shares subject to the repurchase offer. For this purpose, “liquid assets” means assets that may be sold or otherwise disposed of in the ordinary course of business, at approximately the price at which the Fund values them, within the period between the Repurchase Request Deadline and the repurchase payment deadline, or which mature by the repurchase payment deadline. The Fund is also permitted to borrow up to the maximum extent permitted under the 1940 Act to meet repurchase requests.

If the Fund borrows to finance repurchases, interest on that borrowing will negatively affect shareholders who do not tender their Shares by increasing the Fund’s expenses and reducing any net investment income. There is no assurance that the Fund will be able sell a significant amount of additional Shares so as to mitigate these effects.
These and other possible risks associated with the Fund’s repurchase offers are described under “Principal Risks of Investment in the Fund — Repurchase Offers Risk” above. In addition, the repurchase of Shares by the Fund will be a taxable event to shareholders, potentially even to those shareholders that do not participate in the repurchase. For a discussion of these tax consequences, see “Distributions and Federal Income Tax Matters” below and “Tax Status” in the Statement of Additional Information.

SERVICES AGREEMENT

The Fund has entered into a “Services Agreement” with the Adviser pursuant to which the Fund has appointed the Adviser as “servicing agent” to compensate financial industry professionals for providing ongoing services in respect of clients with whom they have distributed Shares of the Fund. These financial industry professionals may provide varying investment products, programs, platforms and accounts, through which investors may purchase, redeem and exchange Shares of the Fund. Shareholder servicing arrangements may include electronic processing of client orders, electronic fund transfers between clients and the Fund, account reconciliations with the Fund’s transfer agent, facilitation of electronic delivery to clients of Fund documentation, monitoring client accounts for back-up withholding and any other special tax reporting obligations, maintenance of books and records with respect to the foregoing, and such other information and liaison services as the Fund or the Adviser may reasonably request. Under the Services Agreement, the Fund pays the Adviser, quarterly in arrears, an investor services fee computed at an annual rate of 0.10% of the average daily net assets of the Fund, computed on a monthly basis.

PAYMENTS TO FINANCIAL FIRMS

The Fund or the Adviser also may enter into agreements with certain Intermediaries under which the Fund makes payments to the Intermediaries in recognition of the avoided transfer agency costs to the Fund associated with the Intermediaries’ maintenance of customer accounts or in recognition of the services provided by Intermediaries through fund platforms. Payments made by the Fund or the Adviser under such agreements are generally based on either (1) a percentage of the average daily net asset value of the customer Shares serviced by the Intermediary, up to a set maximum, or (2) a per account fee assessed against each account serviced by such Intermediary, up to a set maximum. These payments are in addition to other payments described in this prospectus such as the Services Agreement. Investors who invest through financial firms are subject to the eligibility requirements set out herein.

DETERMINATION OF NET ASSET VALUE

The NAV per share of the Fund’s Shares is determined by dividing the total value of the Fund’s portfolio investments, cash and other assets, less any liabilities (including accrued expenses or dividends), by the total number of Shares outstanding. The Fund’s Shares are valued as of a particular time (the “Valuation Time”) on the last day of each week and last day of each month (if different) that the New York Stock Exchange (“NYSE”) opens for business. During any period when the Fund is offering its Shares, it is the current intention of the Fund that the NAV per share of the Shares shall be computed no less frequently than once daily, Monday through Friday, as of the Valuation Time, except on days on which the NYSE does not open for business, provided, however, that the Fund reserves the right to calculate the net asset value more or less frequently if deemed desirable, subject to the requirements of Rule 23c-3. The Valuation Time is ordinarily at the close of regular trading on the NYSE (normally 4:00 p.m. Eastern time). Current net asset values per share of the Fund may be obtained by contacting the Transfer Agent by telephone at (855) 609-3680.

1 The NYSE is open from Monday through Friday, 9:30 a.m. to 4:00 p.m., Eastern time. NYSE, NYSE Arca, NYSE Bonds and NYSE Arca Options markets will generally close on, and in observation of the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.
In accordance with the regulations governing registered investment companies, the Fund’s transactions in portfolio securities and purchases and sales of Fund Shares (which bear upon the number of Fund Shares outstanding) are generally not reflected in the NAV determined for the business day on which the transactions are effected (the trade date), but rather on the following business day.

The Board has approved procedures pursuant to which the Fund will value its investments (the “Valuation Procedures”). The Trustees have established a Valuation Committee comprised of employees of the Adviser to which they have delegated responsibility for overseeing the implementation of the Valuation Procedures and fair value determinations made on behalf of the Board.

Listed below is a summary of certain of the methods currently used to value investments of the Fund under the Valuation Procedures:

With respect to pricing of certain reinsurance-related event-linked or similar restricted securities for which at least one independent market-maker or two independent brokers regularly provide firm bids, the Fund will utilize an independent data delivery vendor to aggregate and provide an average bid price, if applicable, and the independent data delivery vendor will provide this pricing data to the Administrator. If the independent data delivery vendor cannot obtain independent firm bids for such securities, but there is an independent market maker or two independent brokers who will supply firm bids for such securities, then the Adviser may supply the Administrator with a contact from whom to obtain such bids, and the Administrator will contact such independent brokers, and use the bid or average bid, as applicable, as the value of the security. If, with respect to such securities, such independent firm bids are not available, but at least one independent firm or indicative bid is available, then the Valuation Committee may use that bid (or the average of those bids if more than one) as the value of the security if the Valuation Committee determines that such value is reasonable; the Valuation Committee may consider internal and/or independent external models in making that determination.

Short-term debt instruments, such as commercial paper, bankers’ acceptances and U.S. Treasury Bills, having a maturity of 60 days or less, are generally valued at amortized cost.

Other debt securities, including corporate and government debt securities (of U.S. or foreign issuers) and municipal debt securities in each case having a remaining maturity in excess of 60 days, loans, mortgage-backed securities, collateralized mortgage obligations and other asset-backed securities (except event-linked bonds) are valued by an independent pricing service at an evaluated (or estimated) mean between the closing bid and asked prices.

For investments in open-end management companies that are registered under the 1940 Act, the value of the shares of such funds will be calculated based upon the net asset value of such funds. The prospectuses for such funds explain the circumstances under which they will use fair value pricing and its effects.

Equity securities (other than reinsurance-related securities that are valued pursuant to the valuation methods described above) are valued at the last sale, official close or if there are no reported sales at the mean between the bid and asked price on the primary exchange on which they are traded. The values of the Fund’s investments in publicly traded foreign equity securities generally will be determined by a pricing service using pricing models designed to estimate likely changes in the values of those securities between the times in which the trading in those securities is substantially completed and the close of the NYSE.

Exchange-traded derivatives, such as options and futures contracts, are valued at the settlement price on the exchange or mean of the bid and asked prices.

Non-exchange traded derivatives, including OTC options, are generally valued on the basis of valuations provided by a pricing service or using quotes provided by a broker/dealer (typically the counterparty).
If market quotations are not readily available or available market quotations or other information are deemed to be unreliable by the Valuation Committee, and if the valuation of the applicable instrument is not covered by the valuation methods described above or if the valuation methods are described above, but such methods are deemed unreliable by the Valuation Committee, then such instruments will be valued as determined in good faith by the Valuation Committee. In these circumstances, the Fund determines fair value in a manner that seeks to reflect the market value of the security on the Valuation Date based on consideration by the Valuation Committee of any information or factors it deems appropriate. For purposes of determining the fair value of securities, the Valuation Committee may generally consider, without limitation: (i) indications or quotes from brokers, insurance companies, reinsurance companies or other third-party sources (ii) valuations provided by a third-party pricing agent, (iii) internal models that take into consideration different factors determined to be relevant by the Adviser; or (iv) any combination of the above.

Fair value pricing may require subjective determinations about the value of a portfolio instrument. Fair values used to determine the Fund’s NAV may differ from quoted or published prices, or from prices that are used by others, for the same investments. Also, the use of fair value pricing may not always result in adjustments to the prices of securities or other assets or liabilities held by the Fund. It is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of such security. Thus, fair valuation may have an unintended dilutive or accretive effect on the value of shareholders’ investments in the Fund. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not be used to retroactively adjust the price of a security or the NAV determined earlier that day.

It is expected that a substantial portion of the Fund’s investments will be U.S. dollar denominated investments. Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of the Fund’s Shares may be affected by changes in the value of currencies in relation to the U.S. dollar. International markets are sometimes open on days when U.S. markets are closed, which means that the value of foreign securities owned by the Fund could change on days when Fund Shares cannot be bought or sold. The value of investments traded in markets outside the U.S. or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the NYSE is closed, and the NAV of the Fund’s Shares may change on days when an investor is not able to purchase, redeem or exchange Shares. The calculation of the Fund’s NAV may not take place contemporaneously with the determination of the prices of foreign securities used in NAV calculations.

**DISTRIBUTIONS AND FEDERAL INCOME TAX MATTERS**

It is the Fund’s policy to make distributions at least annually of all or substantially all of its net investment income and net realized capital gains, if any. Unless you elect to receive your distributions in cash, your ordinary income and capital gain distributions will be reinvested in additional Shares of the same share class of the Fund at the NAV calculated as of the payment date. The Fund will pay distributions on a per-share basis. As a result, on the ex-dividend date of such a payment, the NAV of the Fund will be reduced by the amount of the payment.

This section summarizes some of the important U.S. federal income tax consequences of investing in the Fund. This discussion does not address all aspects of taxation that may apply to shareholders or to specific types of shareholders such as tax-deferred retirement plans and persons who are not “U.S. persons” within the meaning of the Code. You should consult your tax adviser for information concerning the possible application of federal, state, local or non-U.S. tax laws to you. Please see the Statement of Additional Information for additional information regarding the tax aspects of investing in the Fund.

The Fund has elected and intends to qualify each year to be treated as a “regulated investment company” (a “RIC”) under Subchapter M of Chapter 1 of the Internal Revenue Code of 1986, as amended (the “Code”). A RIC generally is not subject to federal income tax at the fund level on income and gains that are timely distributed to shareholders. To qualify for treatment as a RIC, the Fund must meet certain income, asset diversification and distribution requirements.
The Fund’s investment strategy will potentially be limited by its intention to qualify for treatment as a RIC. The tax treatment of certain of the Fund’s investments under one or more of the qualification or distribution tests applicable to RICs is not certain. An adverse determination or future guidance by the IRS might affect the Fund’s ability to qualify for such treatment. Failure of the Fund to qualify and be eligible to be treated as a RIC would result in fund-level taxation and, consequently, a reduced return on your investment. The Fund could in some cases cure such failure, including by paying a Fund-level tax or interest, making additional distributions, or disposing of certain assets.

The Fund may invest substantially in foreign securities. Such investments may include equity securities of passive foreign investment companies (“PFICs”) for federal income tax purposes. Investments in a PFIC potentially (i) accelerate the recognition of income by the Fund without the receipt of cash, (ii) increase the amount required to be distributed by the Fund to qualify as a RIC or eliminate a Fund-level tax, (iii) result in a higher percentage of Fund distributions treated as ordinary income, or (iv) subject the Fund to a fund-level tax that cannot be eliminated through distributions. Investments in foreign securities may also include equity securities of controlled foreign corporations, in which case the Fund will be required to take into account each year, as ordinary income, its share of certain portions of the issuer’s income, whether or not such amounts are distributed to the Fund. In any of these circumstances, the Fund may need to borrow money or to dispose of certain investments in order to make the distributions required to qualify for treatment as a RIC and to eliminate a Fund-level tax. For additional information, please refer to “Tax Status” in the Statement of Additional Information.

The Fund invests in one or more wholly-owned Subsidiaries that are treated as controlled foreign corporations for U.S. federal income tax purposes. Any Subsidiary will take steps to ensure that income recognized by the Fund in respect of the Subsidiaries will be qualifying income and the Fund will limit its investments in any Subsidiary in the aggregate to 25% of its total assets.

The Fund’s investment in foreign securities may be subject to foreign withholding or other taxes, which may decrease the Fund’s yield on those securities. The Fund may be able to pass through to you a deduction or credit for such foreign taxes, as further described in the Statement of Additional Information.

In addition, the Fund’s investments in debt instruments, foreign securities, foreign currencies, and options and other derivatives may increase or accelerate the Fund’s recognition of income or gain and may affect the timing, amount or character of the Fund’s distributions.

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income. The tax treatment of Fund distributions of capital gains is determined by how long the Fund owned (or is deemed to have owned) the investments that generated them, rather than how long you owned your Shares. Distributions of net capital gains (the excess of the Fund’s net long-term capital gains over net its short-term capital losses) that are properly reported by the Fund as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains, which are taxed to non-corporate shareholders at reduced rates. Distributions of net gains from the sale or deemed disposition of investments that the Fund held or is treated as having held for one year or less will be taxable as ordinary income.

Distributions of investment income properly reported by the Fund as derived from “qualified dividend income,” if any, will be taxed in the hands of individuals at the rates applicable to long-term capital gains, provided that certain holding period and other requirements are met at both the shareholder and Fund level.

If, in and with respect to any taxable year, the Fund makes a distribution to a shareholder in excess of the Fund’s current and accumulated earnings and profits, the excess distribution will be treated as a return of capital to the extent of such shareholder’s tax basis in its shares, and thereafter as capital gain. A return of capital is not taxable, but it reduces a shareholder’s tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.
A 3.8% Medicare contribution tax is imposed on the “net investment income” of certain individuals, estates and trusts to the extent their income exceeds certain threshold amounts. “Net investment income” generally includes dividends, interest, and net gains from the disposition of investment property (including the Fund’s ordinary income dividends, Capital Gain Dividends, and capital gains recognized on the sale, repurchase, or exchange of Fund Shares). Shareholders should consult their own tax advisers regarding the effect, if any, that this provision may have on their investment in Fund Shares.

A dividend will be treated as paid on December 31 of the current calendar year if it is declared by the Fund in October, November or December with a record date in such a month and paid by the Fund during January of the following calendar year. Early in each year, the Fund will send you a statement showing detailed federal tax information with respect to your distributions for the prior tax year.

Distributions are taxable to you even if they are paid from income or gains earned by the Fund prior to your investment (and thus were included in the price you paid for your Shares). For example, if you purchase Shares on or just before the record date of a Fund distribution, you will pay full price for the Shares and could receive a portion of your investment back as a taxable distribution. In general, you will be taxed on the distributions you receive from the Fund, whether you receive them as additional Shares or in cash.

Any gain or loss resulting from the sale or exchange of your Shares in the Fund generally will be treated as a capital gain or loss for federal income tax purposes, which will be long-term or short-term depending on how long you have held your Shares.

Shareholders who tender all of the Shares they hold or are deemed to hold in response to a Periodic Repurchase Offer (see “Periodic Repurchase Offers” above) generally will be treated as having sold their Shares and generally will recognize a capital gain or loss. If a shareholder tenders fewer than all of its common Shares, it is possible that any amounts that the shareholder receives in such repurchase will be taxable as a dividend to such shareholder, and there is a risk that shareholders who do not tender any of their Shares for repurchase will be treated as having received a dividend distribution as a result of their proportionate increase in the ownership of the Fund. The Fund’s use of cash to repurchase Shares could adversely affect its ability to satisfy the distribution requirements for treatment as a RIC. The Fund could also recognize income in connection with its liquidation of portfolio securities to fund Share repurchases. Any such income would be taken into account in determining whether the distribution requirements are satisfied.

In general, dividends (other than Capital Gain Dividends) paid by the Fund to a person who is not a “U.S. person” within the meaning of the Code (a “foreign shareholder”) are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate). However, the Code provides a withholding tax exemption, if the Fund so elects, for certain interest-related dividends and short-term capital gain dividends paid to foreign shareholders.

Sections 1471-1474 of the Code, and the U.S. Treasury Regulations and IRS guidance issued thereunder (collectively, “FATCA”), generally require the Fund to obtain information sufficient to identify the status of each of its shareholders under FATCA or under an applicable intergovernmental agreement (an “IGA”). If a shareholder fails to provide this information or otherwise fails to comply with FATCA or an IGA, the Fund or its agent may be required to withhold under FATCA 30% of the ordinary dividends the Fund pays to shareholders and, on or after January 1, 2019, 30% of the gross proceeds of share repurchases and certain Capital Gain Dividends it pays. If a payment by the Fund is subject to FATCA withholding, the Fund or its agent is required to withhold even if the payment would otherwise be exempt from withholding under rules applicable to non-U.S. shareholders described above (e.g., Capital Gain Dividends). Each prospective shareholder is urged to consult its tax adviser regarding the applicability of FATCA and any other reporting requirements. In addition, foreign countries are considering, and may implement, laws similar in purpose and scope to FATCA, as more fully described above.
Special tax rules apply to investments through defined contribution plans and other tax-qualified plans, including certain minimum distribution requirements. The Fund’s structure as an interval fund, pursuant to which the Fund conducts quarterly repurchase offers which may be oversubscribed, could cause a shareholder to be unable to tender its Shares when or in the amount that it desires, which inability may make it difficult for a shareholder that is a tax-qualified plan to meet minimum distribution requirements. Shareholders should consult their tax advisers to determine the suitability of shares of the Fund as an investment through such plans and the precise effect of such an investment on their particular tax situation.

The discussion above is very general. Please consult your tax adviser about the effect that an investment in the Fund could have on your own tax situation, including possible foreign, federal, state, or local tax consequences, or about any other tax questions you may have.

**DIVIDEND REINVESTMENT PLAN**

Dividends and capital gains distributions are automatically reinvested, unless otherwise noted. You may notify the Transfer Agent in writing to:

- Choose to receive dividends or distributions (or both) in cash; or
- Change the way you currently receive distributions.

Shares may be distributed in lieu of cash. The number of Shares that will be distributed in lieu of cash is determined by dividing the dollar amount of the distribution to be reinvested by the NAV as of the close of business on the day of the distribution.

Your taxable income is the same regardless of which option you choose. For further information about dividend reinvestment, contact the Transfer Agent by telephone at (855) 609-3680.

**DESCRIPTION OF THE FUND**

The Fund is an investment portfolio of Stone Ridge Trust II (the “Trust”), a statutory trust established under the laws of State of Delaware by the Certificate of Trust dated July 17, 2013. The Trust’s Amended and Restated Agreement and Declaration of Trust (the “Declaration of Trust”) authorizes the issuance of an unlimited number of common Shares of beneficial interest, par value, unless the Trustees shall otherwise determine, $0.001 per share. All Shares have equal rights to the payment of dividends and other distributions and the distribution of assets upon liquidation. Shares will, when issued, be fully paid and non-assessable by the Fund and will have no pre-emptive or conversion rights or rights to cumulative voting.

Shareholders are entitled to share equally in dividends declared by the Board payable to holders of Shares and in the net assets of the Fund available for distribution to holders of Shares upon liquidation after payment of the preferential amounts payable to holders of any outstanding preferred shares.

The Declaration of Trust provides for indemnification out of Fund property for all loss and expense of any shareholder or former shareholder held personally liable for the obligations of the Fund solely by reason of such person’s status as a shareholder or former shareholder. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations.

Shareholders have no pre-emptive or conversion rights. Upon liquidation of the Fund, after paying or adequately providing for the payment of all liabilities of the Fund, and upon receipt of such releases, indemnities and refunding agreements as they deem necessary for their protection, the Trustees may distribute the remaining assets of the Fund among the holders of the Shares.
The Board may classify or reclassify any issued or unissued Shares of the Fund into shares of any class by redesignating such Shares or by setting or changing in any one or more respects, from time to time, the preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends, qualifications, or terms or conditions of repurchase of such Shares. Any such classification or reclassification will comply with the provisions of the Declaration of Trust and the 1940 Act.

As of January 31, 2017, the following amount of Shares of the Fund was authorized for registration and outstanding:

<table>

**Anti-Takeover Provisions.** The Declaration of Trust includes provisions that could have the effect of limiting the ability of other entities or persons to acquire control of the Trust or to change the composition of the Board by discouraging a third party from seeking to obtain control of the Trust. These provisions may have the effect of discouraging attempts to acquire control of the Trust, which attempts could have the effect of increasing the expenses of the Fund and interfering with the normal operation of the Fund. The Trustees are elected for indefinite terms and do not stand for reelection. A Trustee may be removed from office without cause only by a written instrument signed or adopted by a majority of the remaining Trustees or by a vote of the holders of at least two-thirds of the class of Shares of the Trust that are entitled to elect a Trustee and that are entitled to vote on the matter. The Declaration of Trust does not contain any other specific inhibiting provisions that would operate only with respect to an extraordinary transaction such as a merger, reorganization, tender offer, sale or transfer of substantially all of the Fund’s asset, or liquidation. Reference should be made to the Declaration of Trust on file with the Commission for the full text of these provisions.

**REPORTS TO SHAREHOLDERS**

The Fund sends to common shareholders unaudited semi-annual and audited annual reports, including a consolidated list of investments held.

**ADDITIONAL INFORMATION**

The prospectus and the Statement of Additional Information do not contain all of the information set forth in the Registration Statement that the Fund has filed with the Commission. The complete Registration Statement may be obtained from the Commission upon payment of the fee prescribed by its rules and regulations. The Statement of Additional Information can be obtained without charge by calling (855) 609-3680.

Statements contained in this prospectus as to the contents of any contract or other document referred to are not necessarily complete, and, in each instance, reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement of which this prospectus forms a part, each such statement being qualified in all respects by such reference.

STONE RIDGE'S PRIVACY NOTICE¹

Stone Ridge's Commitment to Its Customers²

Stone Ridge recognizes and respects the privacy expectation of each of its customers. Stone Ridge believes that the confidentiality and protection of its customers’ non-public personal information is one of its fundamental responsibilities. This means, most importantly, that Stone Ridge does not sell customers’ non-public personal information to any third parties. Stone Ridge uses its customers’ non-public personal information primarily to complete financial transactions that its customers request or to make its customers aware of other financial products and services offered by a Stone Ridge affiliated company.

Information Stone Ridge Collects About Its Customers

Stone Ridge collects non-public personal information about its customers from the following sources:

- **Account Applications and Other Forms**, which may include a customer’s name and address, social security number or tax identification number, total assets, income, and accounts at other institutions;
- **Account History**, which may include information about the transactions and balances in accounts with Stone Ridge; and
- **Correspondence**, which may include written, telephonic or electronic communications.

How Stone Ridge Handles Its Customers’ Personal Information

As emphasized above, Stone Ridge does not sell non-public personal information about current or former customers to third parties. Below are the details of circumstances in which Stone Ridge may disclose non-public personal information to third parties:

- In order to complete certain transactions or account changes that a customer directs, it may be necessary to provide certain non-public personal information about that customer to companies, individuals, or groups that are not affiliated with Stone Ridge. For example, if a customer asks Stone Ridge to transfer assets from another financial institution, Stone Ridge will need to provide certain non-public personal information about that customer to the company to complete the transaction.
- In order to alert a customer to other financial products and services that a Stone Ridge affiliated company offers, Stone Ridge may share non-public personal information it has about that customer with a Stone Ridge affiliated company.
- In certain instances, Stone Ridge may contract with non-affiliated companies to perform services for or on behalf of Stone Ridge. Where necessary, Stone Ridge will disclose non-public personal information it has about its customers to these third parties. In all such cases, Stone Ridge will provide the third party with only the information necessary to carry out its assigned responsibilities and only for that purpose. In addition, Stone Ridge requires these third parties to treat Stone Ridge customers’ non-public information with the same high degree of confidentiality that Stone Ridge does.
- Finally, Stone Ridge will release non-public information about customers if directed by that customer to do so or if Stone Ridge is authorized by law to do so.

² For purposes of this notice, the term “customer” or “customers” includes both individuals who have investments with a Stone Ridge-affiliated company and individuals who have provided non-public personal information to a Stone Ridge affiliated company, but did not invest with a Stone Ridge affiliated company.
How Stone Ridge Safeguards Its Customers’ Personal Information

Stone Ridge restricts access to information about customers to its employees and to third parties, as described above. Stone Ridge maintains physical, electronic, and procedural safeguards reasonably designed to protect the confidentiality of its customers’ non-public personal information.

Keeping Its Customers Informed

As required by federal law, Stone Ridge will notify customers of Stone Ridge’s Privacy Policy annually. Stone Ridge reserves the right to modify this policy at any time, but in the event that there is a change, Stone Ridge will promptly inform its customers of that change.
